Petrovan, Nigel G. Taylor, William J. Sutherland, Nathalie Pettorelli, 2023-08-08 This book was produced by the Zoological Society of London and the University of Cambridge with two aims to assess seabirds vulnerability to climate change in the North East Atlantic and to identify potential conservation actions that could reduce this vulnerability Seabirds in the North East Atlantic collates information from the scientific literature non governmental

organisations reports conservation practitioner input and online databases into a single volume and provides a reference manual to assist conservation planning It is intended to be used by anyone who wishes to identify climate change threats to seabirds to compare threats between different areas of the North East Atlantic to start a quantitative climate change vulnerability assessment for a local population or to review options for conservation action in response to climate change This book stems from research published in December 2022 but assessments may be updated based on feedback and newly available information To check for updates to our assessments please visit our website at www.ZSL.org seabird guidelines
