Physiological Psychology Simon Green,2016-07-15 Originally published in 1987 this title was designed as a textbook for first degree students of psychology and provides an introduction to the major topics within the subject of physiological psychology The aim was to cover these major subject areas and at the same time to provide indications of advances made in the previous two decades Today the book is still suitable for all levels of study from beginning students to final year level who wish to cover historical aspects of physiological psychology

An Introduction to the Psychology of Paranormal Belief and Experience Tony Jinks,2011-11-08 When someone admits to a strange experience such as witnessing an unidentified flying object having telepathic hunches or seeing angels or ghosts listeners usually explain it away as mistaken perception intoxication ignorance or even mental illness Though these unsympathetic psychology based explanations remain the most popular responses to claims of the supernatural those who use them often have little understanding of what such dismissive solutions actually entail This study offers a balanced and accessible analysis of various explanations for the paranormal By providing insight into how these theories are applied or misapplied to inquiry into the paranormal it clarifies the relationship between the field of psychology and the supernatural Instructors considering this book for use in a course may request an examination copy here

Psychological Foundations of Education B. Claude Mathis,John W. Cotton,Lee Sechrest,2013-09-17 Psychological Foundations of Education presents some of the principles of psychology that are relevant to learning and teaching It presents an alternative answer to the problem of the bifurcation of general and educational psychology in the curriculum of teacher preparation While the solution is provisional and has obvious imperfections it is offered in the hope that it may stimulate discussion of the problem and other solutions and or explicit justifications for past practice Key concepts discussed include teachers attitudes and behavior different types of learning technology in education forgetting and extinction child development and intelligence measurements Also covered are the assessment of educational achievement the social psychology of the classroom and education in urban schools This text should have a variety of uses in classes where students are preparing for teaching It was written specifically for those situations in which the prospective teacher is introduced to psychology through a one or two semester integrated sequence

The Neuropsychology of Women Elaine Fletcher-Janzen,2008-12-19 The Diversity in Clinical Neuropsychology series is designed to highlight cultural and moderator variables involved in the study of brain behavior relationships Historically the study of psychology and neuropsychology has focused on the male brain being the standard to which all or most variables are considered The study of sex differences is perhaps the most provoking and far reaching aspect of diversity because

frequently women have unique assessment and treatment needs For example frontal lobe functioning tends to be more contextual for women than for men These brain functions have behavioral counterparts that directly relate to how interventions may be tailor made to suit the female rather than male patient The goal in neuropsychology is always to improve diagnosis and treatment outcomes and a cohesive summary of the neuropsychology of the female brain would raise awareness and cultural competency of clinicians in neuropsychology Authors will focus on sex differences in the neuropsychological cognitive and development literature ethnic and socioeconomic variables affecting diagnosis and treatment of women and social emotional and behavioral manifestations of neuropsychological sex differences

Foundations of Physiological Psychology Richard Frederick Thompson,1979 **The Primacy of Movement** Maxine Sheets-Johnstone,2011-07-06 This expanded second edition carries forward the initial insights into the biological and existential significances of animation by taking contemporary research findings in cognitive science and philosophy and in neuroscience into critical and constructive account It first takes affectivity as its focal point elucidating it within both an enactive and qualitative affective kinetic dynamic It follows through with a thoroughgoing interdisciplinary inquiry into movement from three perspectives mind brain and the conceptually reciprocal realities of receptivity and responsivity as set forth in phenomenology and evolutionary biology respectively It ends with a substantive afterword on kinesthesia pointing up the incontrovertible significance of the faculty to cognition and affectivity Series A **Invitation to Psychology** John P. Houston,Helen Bee,David C.

Rimm,2013-10-22 Invitation to Psychology provides an introduction to fundamental concepts in psychology It seeks to address the need of both teachers and students by offering two different kinds of chapters The first variety covers the basic data and research within each of the traditional areas of psychology In these basic chapters the authors provide up to date and complete coverage of important developments in each area The second type of chapter is innovative These exploring chapters examine some of the practical applications and implications of the findings discussed in the basic chapters These describe how basic psychological data are being used in the outside world and discuss ongoing often controversial explorations into some frontier areas of psychology In other words information about explorations and applications that is often scattered through the pages of other texts is brought together into systematic chapters in this text The dual chapter approach helps resolve the dilemma of differing expectations of teachers and students Key topics covered include the definition of psychology the psychological basis of behavior sensation and perception states of awareness learning memory and cognition motivation and emotion abnormal psychology and social behavior
