Fundamentals Of Electromagnetics For Electrical And Computer Engineering:

Fundamentals of Electromagnetics for Electrical and Computer Engineering Nannapaneni Narayana Rao, 2009
Fundamentals of Electromagnetics for Electrical and Computer Engineering First Edition is appropriate for all beginning courses in electromagnetics in both electrical engineering and computer engineering programs This is ideal for anyone interested in learning more about electromagnetics Dr N Narayana Rao has designed this compact one semester textbook in electromagnetics to fully reflect the evolution of technologies in both electrical and computer engineering This book's unique approach begins with Maxwell's equations for time varying fields first in integral and then in differential form and also introduces waves at the outset Building on these core concepts Dr Rao treats each category of fields as solutions to Maxwell's equations highlighting the frequency behavior of physical structures Next he systematically introduces the topics of transmission lines waveguides and antennas To keep the subject's geometry as simple as possible while ensuring that students master the physical concepts and mathematical tools they will need Rao makes extensive use of the Cartesian coordinate system Topics covered in this book include uniform plane wave propagation material media and their interaction with uniform plane wave fields essentials of transmission line analysis both frequency and time domain metallic waveguides and Hertzian dipole field solutions Material on cylindrical and spherical coordinate systems is presented in appendices where it can be studied whenever relevant or convenient Worked examples are presented throughout to illuminate and in some cases extend key concepts each chapter also contains a summary and review questions Note this book provides a one semester alternative to Dr Rao's classic textbook for two semester courses Elements of Engineering Electromagnetics now in its Sixth Edition *Fundamentals of Electromagnetics with MATLAB* Karl Erik Lonngren, Sava Vasilev Savov, Randy J.
