The name sapphire (Greek—blue) used to be applied to various stones. In antiquity and as late as the Middle Ages, the name sapphire was understood to mean what is today described as lapis lazuli. Around 1800 it was recognized that sapphire and ruby are gem varieties of corundum. At first only the blue variety was called sapphire, and corundums of other colors (with the exception of red) were given special, misleading names, such as "Oriental peridot" for the green variety and "Oriental topaz" for the yellow type.

Today corundums of gemstone quality of all colors except red are called sapphires. Red varieties are called rubies (page 98). The various colors of sapphire are qualified by description, e.g., green sapphire or yellow sapphire. Colorless sapphire is called *leukos-sapphire* (Greek—white), pinkish orange sapphire *Padparadscha* (Sinhalese for "Lotus Flower").

There is no definite demarcation between ruby and sapphire. Light red, pink, or violet corundums are usually called sapphires, as in this way they have individual values in comparison with other colors. If they were grouped as rubies, they would be stones of inferior quality. The coloring agents in blue sapphire are iron and titanium; and in violet stones, vanadium. A small iron content results in yellow and green tones; chromium produces pink, iron, and vanadium orange tones. The most desired color is a pure cornflower-blue. In artificial incandescent light, some sapphires can appear to be ink-colored or black-blue.

Though heat treatment at temperatures of about 3100-3500 degrees F (1700-1900 degrees C), some cloudy sapphires, nondescript in color, can change to a bright blue permanent color.

Hardness is the same as ruby and also differs chiefly in different directions (an important factor in cutting). There is no fluorescence characteristic for all sapphires.

Inclusions of rutile needles result in a silky sheen, oriented, i.e., aligned, needles cause a six-rayed star sapphire (page 503, no. 2).

Gemstones Of The World Newly Revised Fifth Edition:

Gilded Age Ivan Franceschini, Nicholas Loubere, 2018-04-01 According to the Chinese zodiac 2017 was the year of the fire rooster an animal often associated with the mythical fenghuang a magnificently beautiful bird whose appearance is believed to mark the beginning of a new era of peaceful flourishing Considering the auspicious symbolism surrounding the fenghuang it is fitting that on 18 October 2017 President Xi Jinping took to the stage of the Nineteenth Party Congress to proclaim the beginning of a new era for Chinese socialism However in spite of such ecumenical proclamations it became immediately evident that not all in China would be welcome to reap the rewards promised by the authorities Migrant workers for one remain disposable Lawyers activists and even ordinary citizens who dare to express critical views also hardly find a place in Xi's brave new world This Yearbook traces the stark new gilded age inaugurated by the Chinese Communist Party It does so through a collection of more than 40 original essays on labour civil society and human rights in China and beyond penned by leading scholars and practitioners from around the world
