Handbook of Research on Updating and Innovating Health Professions Education: Post-Pandemic Perspectives Ford, Channing R.,Garza, Kimberly B.,2021-10-08 The outbreak of the Coronavirus in early 2020 resulted in unprecedented changes to health professions education The pervasive stay at home orders resulted in faculty who were trained for preparing the next generation of health professionals in a traditional learning environment throwing out their lesson plans and starting anew New approaches to

teaching and learning were created quickly and without the typical extensive planning which introduced several challenges. However, lessons learned from these approaches have also resulted in increased technology adoption, innovative assessment strategies, and increased creativity in the learning environment. The Handbook of Research on Updating and Innovating Health Professions Education Post Pandemic Perspectives explores the various teaching and learning strategies utilized during the pandemic and the innovative approaches implemented to evaluate student learning outcomes and best practices in non-traditional academic situations and environments. The chapters focus specifically on lessons learned and best practices in health professions education and the innovative and exciting changes that occurred, particularly with the adoption and implementation of technology. It provides resources and strategies that can be implemented into the current educational environments and into the future. This book is ideal for inservice and preservice teachers, administrators, teacher educators, practitioners, medical trainers, medical professionals, researchers, academicians, and students interested in curriculum, course design, development of policies and procedures within academic programs, and the identification of best practices in health professions education.

Handbook of Research on Developments and Future Trends in Transnational Higher Education Morris, Gareth Richard, Li, Li, 2023-01-05. Higher education has embraced a period of increasingly rapid development due to the speed of technological advances, increased global competition, an ever more astute and savvy consumer base, and ethical planetary responsibilities. One such educational development is transnational education (TNE). The global pandemic has made TNE a timely topic because traditional international education, which relies on the mobility of staff and students, experienced unprecedented challenges with borders closed and travel banned. This has presented the international education community with a unique opportunity to reassess the effectiveness and efficiency of transnational activities from a social, ethical, and environmental perspective. The Handbook of Research on Developments and Future Trends in Transnational Higher Education offers a perspective of what the future of TNE may look like, what models of TNE there are, its impact, and what institutions may have to do to be successful moving forward. Universities around the world are growing their TNE partnerships. This reference book explores the benefits TNE can offer universities, staff, and students while increasing its global outlook and capabilities. It further provides concrete suggestions to readers considering this. Covering topics such as employability, skill enhancement, formative assessment, and online higher education, this major reference work is an excellent resource for faculty and administrators of higher education, teacher educators, entrepreneurs, researchers, librarians, and academicians.

Chronic Illness and Disability Esther Chang, Amanda Johnson, 2014. This text provides evidence-based principles for practice for chronic illness and disability.
