

COMPUTER SECURITY INCIDENT HANDLING GUIDE

iii

Authority

This publication has been developed by NIST to further its statutory responsibilities under the Federal

Information Security Management Act (FISMA), Public Law (P.L.) 107-347. NIST is responsible for

developing information security standards and guidelines, including minimum requirements for Federal

information systems, but such standards and guidelines shall not apply to national security systems

without the express approval of appropriate Federal officials exercising policy authority over such

systems. This guideline is consistent with the requirements of the Office of Management and Budget

(OMB) Circular A-130, Section 8b(3), Securing Agency Information Systems, as analyzed in Circular A-

130, Appendix IV: Analysis of Key Sections. Supplemental information is provided in Circular A-130,

Appendix III, Security of Federal Automated Information Resources.

Draft Computer Security Incident Handling Guide

Anthony Masys

Draft Computer Security Incident Handling Guide:

Computer Security Incident Handling Guide (draft) :, 2012 *Computer security incident handling guide (draft)* ,2012

Information Security in the Federal Government United States. Congress. House. Committee on Government Reform. Subcommittee on Technology, Information Policy, Intergovernmental Relations, and the Census, 2004 **Disaster Management: Enabling Resilience** Anthony Masys, 2014-11-03 The present work will discuss relevant theoretical frameworks and applications pertaining to enabling resilience within the risk crisis and disaster management domain The contributions to this book focus on resilience thinking along 4 broad themes Urban Domain Cyber Domain Organizational Social domain and Socio ecological domain This book would serve as a valuable reference for courses on risk crisis and disaster management international development social innovation and resilience This will be of particular interest to those working in the risk crisis and disaster management domain as it will provide valuable insights into enabling resilience This book will be well positioned to inform disaster management professionals policy makers and academics on strategies and perspectives regarding disaster resilience You've got mail, but is is secure? United States. Congress. House. Committee on Government Reform, 2004 Information Security Gregory C. Wilshusen (au), 2005-11 Fed agencies are facing a set of cybersecurity threats that are the result of increasingly sophisticated methods of attack the fed agencies perceptions of risk governmentwide challenges to protecting fed systems from these threats Illus *The National Archives' Ability to Safeguard the Nation's Electronic Records* United States. Congress. House. Committee on Oversight and Government Reform. Subcommittee on Information Policy, Census, and National Archives, 2010 **Information security emerging cybersecurity issues threaten federal information systems : report to congressional requesters.** , 2005

Computer Security Incident Handling Guide Paul Cichonski, Tom Mllar, Tim Grance, Karen Scarfone, U. S. Department U.S. Department of Commerce, 2012-08-31 Computer security incident response has become an important component of information technology IT programs Because performing incident response effectively is a complex undertaking establishing a successful incident response capability requires substantial planning and resources This publication assists organizations in establishing computer security incident response capabilities and handling incidents efficiently and effectively This publication provides guidelines for incident handling particularly for analyzing incident related data and determining the appropriate response to each incident The guidelines can be followed independently of particular hardware platforms operating systems protocols or applications **The CSSLP Prep Guide** Ronald L. Krutz, Alexander J. Fry, 2009-08-24 The first test prep guide for the new ISC2 Certified Secure Software Lifecycle Professional exam The CSSLP Certified Secure Software Lifecycle Professional is a new certification that incorporates government standards and best practices for secure software development It emphasizes the application of secure software methodologies during the software development cycle If you re an IT professional security professional software developer project manager software assurance tester executive

manager or employee of a government agency in a related field your career may benefit from this certification Written by experts in computer systems and security The CSSLP Prep Guide thoroughly covers all aspects of the CSSLP certification exam with hundreds of sample test questions and answers available on the accompanying CD The Certified Secure Software Lifecycle Professional CSSLP is an international certification incorporating new government commercial and university derived secure software development methods it is a natural complement to the CISSP credential The study guide covers the seven domains of the CSSLP Common Body of Knowledge CBK namely Secure Software Concepts Secure Software Requirements Secure Software Design and Secure Software Implementation Coding and Testing Secure Software Testing Software Acceptance and Software Deployment Operations Maintenance and Disposal Provides in depth exploration and explanation of the seven CSSLP domains Includes a CD with hundreds of practice exam questions and answers The CSSLP Prep Guide prepares you for the certification exam and career advancement NIST Special Publication 800-61 Revision 1 Computer Security Incident Handling Guide Nist,2012-02-22 NIST Special Publication 800 61 Revision 1 Computer Security Incident Handling Guide is a set of recommendations of The National Institute of Standards and Technology for the preparation of incident response This publication seeks to assist organizations in mitigating the risks from computer security incidents by providing practical guidelines on responding to incidents effectively and efficiently It includes guidelines on establishing an effective incident response program but the primary focus of the document is detecting analyzing prioritizing and handling incidents Agencies are encouraged to tailor the recommended guidelines and solutions to meet their specific security and mission requirements Topics covered include Organization of computer security incident capabilityHow to handle computer security incidentsHandling denial of service incidentsHandling malicious code incidentsHandling unauthorized access incidentsHandling inappropriate usage incidentsHandling multiple component incident Audience This document has been created for computer security incident response teams CSIRTs system and network administrators security staff technical support staff chief information officers CIOs computer security program managers and others who are responsible for preparing for or responding to security incidents Disclaimer This hardcopy is not published by National Institute of Standards and Technology NIST the US Government or US Department of Commerce The publication of this document should not in any way imply any relationship or affiliation to the above named organizations and Government

Law Enforcement Records

Management Guide ,1996 Technology has changed considerably since the second edition of the guide was printed While records continue to be a critical component of the operation of a law enforcement agency the changes in technology are proving to be a welcome addition to the tools a records manager may have to keep pace with the increasing demands for records storage and retrieval The manual will provide a glimpse of new technologies and systems that are available to law enforcement today Since the last edition was published there have been significant changes in the legislation several of which require reporting of specific crimes to the California Department of Justice Those legislative changes and case law decisions affecting records managers have been included in this edition We have expanded the scope of our records manual and include information on new justice data systems which are available to all California law enforcement agencies
