By: Sindoor and Varun.

Case Synopsis

Dropbox, founded in April 2007 by Drew Houston, is a downloadable application that allows users to easily share, sync, and store files (photos, documents, videos, etc.) across most personal computers and smartphones. It has a user base of 7 million, two thirds of whom resided outside the U.S. The company reached this scale by offering a single product version to both consumers and business users. Customers relied on dropbox for specific tasks such as backing up photos, running a startup or collaborating on Office documents. Users were constantly requesting new features, many of which would violate the company's commitment to offering a simple easy-to-use product.

Houston graduated from MIT in January 2006 with a bachelor's degree in computer engineering. After setting up a couple of startups he was looking for something more challenging. Once he left his USB flash drive at home and went to Manhattan, where he was frustrated not to find it and this made him come up with a concept of developing a service to sync and share files between personal computers over the internet. He recruited Arash Ferdowsi who was an MIT drop out, to help him in this new project. Although Dropbox was a late entrant in the file sharing segment Houston was confident that it would succeed in the face of intense competition and also due to market researchers like IDC predicting that the worldwide market for online backup services would grow to \$715 million by 2011.

Houston and Ferdowsi created a prototype that allowed Windows PC users to access files of any size or type via an encrypted internet connection from other Drop-Box enabled PCs or from any web browser. With a working prototype in hand, Houston came up with an innovative approach for testing demand. He had produced recruiting videos for his college fraternity; with this know-how he created a three-minute screencast of a product demo and uploaded it to Hacker News, a popular online forum for developers.

Dropbox received funding from Y Combinator in April 2007 of \$15,000. Houston had understood that they can't make sales unless certified by it and no certificate is obtained until you have a track record. So they started targeting single users and not businesses in the beginning. They adopted Guerilla marketing tactics. In 2008 the company launched its Windows and Mac clients and added a Linux version too.

There was a need for a product manager as the company was expanding and new products were being designed. Their marketing efforts included search engine optimization of their product using Adwords. Paid search advertising was proving very costly and hence they had

Ramanujam,Georg Tacke,2016-05-02 Surprising rules for successful monetization Innovation is the most important driver of growth Today more than ever companies need to innovate to survive But successful innovation measured in dollars and cents is a very hard target to hit Companies obsess over being creative and innovative and spend significant time and expense in designing and building products yet struggle to monetize them 72% of innovations fail to meet their financial targets or fail entirely Many companies have come to accept that a high failure rate and the billions of dollars lost annually is just the cost of doing business Monetizing Innovations argues that this is tragic wasteful and wrong Radically improving the odds that your innovation will succeed is just a matter of removing the guesswork That happens when you put customer demand and

willingness to pay in the driver seat when you design the product around the price It s a new paradigm and that opens the door to true game change You can stop hoping to monetize and start knowing that you will The authors at Simon Kucher know what they re talking about As the world s premier pricing and monetization consulting services company with 800 professionals in 30 cities around the globe they have helped clients ranging from massive pharmaceuticals to fast growing startups find success In Monetizing Innovation they distil the lessons of thirty years and over 10 000 projects into a practical nine step approach Whether you are a CEO executive leadership or part of the team responsible for innovation and new product development this book is for you with special sections and checklist driven summaries to make monetizing innovation part of your company s DNA Illustrative case studies show how some of the world s best innovative companies like LinkedIn Uber Porsche Optimizely Draeger Swarovski and big pharmaceutical companies have used principles outlined in this book A direct challenge to the status quo spray and pray style of innovation Monetizing Innovation presents a practical approach that can be adopted by any organization in any industry Most monetizing innovation failure point home Now more than ever companies must rethink the practices that have lost countless billions of dollars Monetizing Innovation presents a new way forward and a clear promise Go from hope to certainty
