Abstract

The therapeutic alliance is considered the most robust process variable associated with positive therapeutic outcome in a variety of psychotherapeutic models (Alexander, L. B., & Luborsky, L. (1986). The Penn Helping Alliance Scales. In L. S. Greenberg & W. M. Pinsoff (Eds.), *The psychotherapeutic process: A research handbook* (pp. 325–356). New York: Guilford Press; Horvath, A. O., Gaston, L., & Luborsky, L. (1993). The alliance as predictor of benefits of counseling and therapy. In N. Miller, L. Luborsky, J. Barber, & J. P. Docherty (Eds.), *Psychodynamic treatment research: A handbook for clinical practice* (pp. 247–274). New York, NY: Basic Books; Horvath, A. O., Del Re, A. C., Flückiger, C., & Symonds, D. (2011). Alliance in individual psychotherapy. *Psychotherapy*, 48, 9–16; Orinsky, D., Grune, K., & Parks, B. (1994). Process and outcome in psychotherapy: Noch annual. In A. Bergin & J. S. Garfield (Eds.), *Handbook of psychotherapy and behavior change* (4th ed., pp. 270–378). New York, NY: Wiley and Sons). The relationship between alliance and outcome has traditionally been studied based on measures that assess these therapy factors at a global level. However, the specific variations of the alliance process and their association with therapy segments that are relevant for change have not yet been fully examined. The present study examines the variations in the therapeutic alliance in 73 significant in-session events: 35 change and 38 stuck episodes identified through the observation of 14 short-term therapies of different theoretical orientations. Variations in the alliance were assessed using the VTAS-SF (Shackel, K., & Diamond, G. (2008). Short form of the revised Vanderbilt Therapeutic Alliance Scale: Development, reliability, and validity. *Psychotherapy Research*, 18, 433–443). Nested analyses (HLM) indicate a statistically significant better quality of the alliance during change episodes.

Keywords: alliance; change and stuck episodes; process and outcome

The therapeutic alliance has received a great deal of attention both in the field of psychotherapy research and of clinical practice and training for the last four decades (Alexander & Luborsky, 1986; Corbelli & Botella, 2003; Horvath, Del Re, Flückiger, & Symonds, 2011; Horvath & Luborsky, 1993; Horvath & Symonds, 1991; Lambert & Ogles, 2004; Orinsky, Grune, & Parks, 1994). To a great extent the popularity of this concept is due to the cumulative findings that support its association with positive treatment outcome along a wide variety of therapeutic

models (Horvath & Luborsky, 1993; Horvath et al., 2011; Lambert & Ogles, 2004; Orinsky et al., 1994). The effect size linking alliance to outcome has been consistently estimated between .25 and .30 which is a moderate correlation ($r = .275$), but a significant relationship (Horvath et al., 2011).

Nonetheless, a major question debated within this field of study is the specificity of this association between alliance and outcome. Originally, the most accepted definitions of the alliance considered it a global indicator of the quality of the collaborative

Disentangling The Change Alliance Relationship:

The Patient's Change: Understanding the Complexity of the Dynamics of Change and its Precursors in Psychotherapy Giulio de Felice, Reitske Meganck, Guenter Karl Schiepek, Melissa Miléna De Smet, 2021-10-21 **Therapeutic Failures in Psychotherapy** Nicola Gazzola, Shigeru Iwakabe, Sarah Knox, 2023-10-17 This book examines therapeutic failures in psychotherapy. Despite the consistent positive outcome findings and psychotherapists' best intentions in their efforts to help their clients, psychotherapy simply does not work in all cases. In fact, 5-10% of adult clients deteriorate during psychotherapy. Although not exclusively due to treatment failures per se, almost a fifth of clients terminate their therapy prematurely, and findings suggest that between 20 and 30% of clients do not return after the first session, with half terminating after just two sessions. Therapeutic failures could include a range of negative therapy outcomes such as harm, deterioration, client non-response, premature termination or dropout, as well as process factors such as negative therapy experiences, impasses or alliance ruptures. Investigating therapeutic failures holds the key to improving the effectiveness of psychotherapy as well as understanding some of the fundamental conditions that need to be in place for the change mechanisms of psychotherapy to take effect. Although psychotherapy has made many strides over the last few decades to improve research rigour and to promote evidence-based practices, it is a profession that is still growing. By embracing the opportunity to learn from therapeutic failures, the profession will continue to refine its practices to better serve clients and to strive toward developing ethical and effective practices. Both comprehensive and accessible, this book will be of great interest to psychotherapists in practice, therapists in training, as well as students and professionals in psychology and mental health in general. The chapters in this book were originally published in *Counselling Psychology Quarterly*. **Peace Through a Disentangling Alliance** Robert Stein, 1916 **The Neurobiology of the Gilles De La Tourette Syndrome and Chronic Tics: Part A**, 2022-07-06 The *Neurobiology of the Gilles de la Tourette Syndrome and Chronic Tics* Volume Three reviews historical background and current nosology and guidelines. In addition, it includes an overview of pathophysiology ranging from its genetic basis and changes in neurochemistry and electrophysiology to widespread neural circuits. Specific chapters cover Tourette syndrome from phenomenology and natural history to neurobiology. Update and recent progress in the neurobiology of Tourette Syndrome. Current guidelines and nosology of Tourette syndrome. Neuroimaging applications in Tourette's Syndrome. Clinical and neurodevelopmental brain imaging of Tourette syndrome. Altered structural connectivity in Gilles de la Tourette Syndrome and much more. The last 20 years have seen an exponentially growing body of research dedicated to Gilles de la Tourette Syndrome. In the understanding of the syndrome's complex genetics and underlying neurobiology, this unprecedented surge in basic and clinical research has resulted in over 3,000 scientific publications.
