Sirkar,Ana-Maria Sastre,2020-11-23 This book on hollow fiber contractors presents an up to date compilation of the latest developments and milestones in this membrane technology Hollow Fiber Membrane Contactors Module Fabrication Design and Operation and Potential Applications provides a comprehensive discussion of hollow fiber membrane applications including a few case studies in biotechnology chemical food and nuclear engineering The chapters in this book have been classified using the following based on different ways of contacting fluids with each other

Gas liquid contacting Liquid liquid contacting Supported liquid membrane Supported gas membrane Fluid fluid contacting
 Other features include Discusses using non dispersive solvent extraction hollow fiber strip dispersion hollow fiber supported
 liquid membranes and role of process intensification in integrated use of these processes Provides technical and economic
 perspectives with several case studies related to specific scenarios Demonstrates module fabrication design operation and
 maintenance of hollow fiber contactors for different applications and performance Presents discussion on newer concepts
 like membrane emulsification membrane nanoprecipitation membrane crystallization and membrane condenser Special focus
 on emerging areas such as the use of hollow fiber contactor in back end of nuclear fuel cycle membrane distillation
 dehumidification of air and gas absorption and stripping Discusses theoretical analysis including computational modeling of
 different hollow fiber membrane processes and presents emphasis on newly developed area of hollow fiber membrane based
 analytical techniques Presents discussion on upcoming area dealing with hollow fiber contactors based technology in
 fermentation and enzymatic transformation and in chiral separations This book is equally suited for newcomers to the field as
 well as for engineers and scientists that have basic knowledge in this field but are interested in obtaining more information
