

DIY compressed air BB machine gun.

This step-by-step building instruction shows you how to build a simple compressed air BB machine gun with common available parts.

The BB machine gun pictured in this build has a 6 litre air supply and a magazine holding 1000+ BB's. The rate of fire is around 150+ BB/sec The 6 litre air canister holds enough compressed air to empty the magazine when filled. This machine gun is specifically designed to handle steel BB's.

The air canister can be filled with an ordinary bicycle pump, but will not perform as good as if it were filled with a refrigerator compressor or equivalent.
No exotic tools are needed to complete this project.
