Everything Flirts Sharon Wahl,2024-11-05 At the heart of the stories in *Everything Flirts* are some of life's trickiest questions Why is it so hard to make the first move on a date How do we find the person we will love If you finally find a person to love how do you convince them to love you back With a mixture of humor and reverence Sharon Wahl hijacks classic works of philosophy and turns their focus to love The philosopher Wittgenstein helps us consider the limits of language Does there exist an argument a logical deduction that will cause another person to love us The philosopher Zeno's laws of motion stipulate that we can only ever cross half of any distance This principle is applied to a first date where making a first move becomes more and more impossible because the movie this couple goes to see is a depressing mood killer A woman afraid of love applies Bentham's utilitarian principles to find her perfect match testing every man she meets until she finds one who passes every one of her tests Nonetheless she wonders Is he right for her Is she ready to fall in love forever The sublime and the ridiculous come together to playfully examine why love just might be a topic too hard for philosophers to explain

Language and the Ineffable Louis S. Berger,2011-01-20 One's conception of language is central in fields such as linguistics but less obviously so in fields studying matters other than language In *Language and the Ineffable* Louis S Berger demonstrates the flaws of the received view of language and the difficulties they raise in multiple disciplines This breakthrough study sees past failures as inevitable since reformers retained key detrimental features of the received view Berger undertakes a new reform grounded in an unconventional model of individual human development A central radical and generative feature is the premise that the neonate's world is holistic boundary less unimaginable impossible to describe in other words ineffable completely distinct from what Berger calls adultocentrism The study is a wholly original approach to epistemology separate from the traditional interpretations offered by skepticism idealism and realism The work rejects both the independence of the world and the possibility of true judgment a startling shift in the traditional responses to the standard schema *Language and the Ineffable* evolves a unique conception of language that challenges and unsettles sacrosanct beliefs not only about language but other disciplines as well Berger demonstrates the framework's potential for elucidating a wide range of problems in such diverse fields as philosophy logic psychiatry general experimental psychology psychotherapy and arithmetic The reconceptualization marks a revolutionary turn in language studies that reaches across academic boundaries

Philosophy and Fiction Schuy R. Weishaar,2022-11-22 Fiction lies in order to tell the truth and seeks reality through shadows Philosophy attempts to dispel false realities it pursues clear understanding of things as they are

While the relation of philosophy and fiction is perhaps paradoxical they implicate one another's picture of human experience. This book uses fiction to help readers process philosophical themes and the philosophical reflection in turn helps clarify the fiction. The study moves through roughly a hundred years of modern fiction from Washington Irving's *The Devil and Tom Walker* 1824 through James M. Cain's *Double Indemnity* 1936. Several classic works of literary fiction are examined, a few largely forgotten stories and several popular novels. Reading fiction through the lens of philosophy helps readers perceive the complexity and richness of fiction, reinvigorating the pursuit of wisdom that lies just beneath the surface of the words on the page.

My Search for Meaning Laurence C. Jeffrey, 2024-11-04. The text *My Search for Meaning* was inspired by the author's early curiosity about life's meaning and his reflection on several worldly experiences traversing the continents of North and South America, Europe, Asia, and Africa. His interest in and studies of western academic philosophy provides the schema that brings to light the crux of his discovery, and the text is intended to share with the reader the author's understanding of life. The author hopes that by reading this text, it would inspire others to explore philosophical ideas in a broader context.

Rethinking the Curriculum Orlando Nang Kwok Ho, 2018-12-13. This book is an interdisciplinary endeavour encompassing education and basic research. It discusses the modular curriculum embodied in *The Epistle* from educational, historical, sociolinguistic, anthropological, phenomenological, and non-sectarian perspectives. It shows the cross-boundary philosophical reasoning and pedagogic dimensions of St Paul as a great teacher and thinker from the Jewish and Christian faith. In doing so, this book refocuses academia's attention on the inevitable antimononic nature inherent in humans' efforts to create systemic knowledge. Knowledge about the inner aesthetic and volitional interpretative self, the immanent psychic I, and other philosophical aspects of the realm of the transcendental should be rescued from the deepening trends of secularity. Being strong, powerful, productive, and performative should not be taken as the indisputable and exclusive aim of education. Science, Technology, Engineering, and Mathematics (STEM) do not constitute a sufficient basis for building a better humanity. Education via public curriculums ought

to serve both the belly and the mind Deliberative curricular recalibrations with rationales for grace are thus needed for a better future for humanity This book is relevant for anyone with a core fascination about truths values epistemologies life spirituality and holistic human development It can also be used as a textbook or a reference in a number of fields including counselling psychology translation cultural studies and theology

The Evolutionary Argument against Naturalism Jim Slagle, 2021-06-17 Contemporary discussions in metaphysics epistemology and philosophy of mind are dominated by the presupposition of naturalism Arguing against this established convention Jim Slagle offers a thorough defence of Alvin Plantinga's Evolutionary Argument against Naturalism EAAN and in doing so reveals how it shows that evolution and naturalism are incompatible Charting the development of Plantinga's argument Slagle asserts that the probability of our cognitive faculties reliably producing true beliefs is low if ontological naturalism is true and therefore all other beliefs produced by these faculties including naturalism itself are self defeating He critiques other well known epistemological approaches including those of Descartes and Quine and deftly counters the many objections against the EAAN to conclude that metaphysical naturalism should be rejected on the grounds of self defeat By situating Plantinga's argument within a wider context and showing that science and evolution cannot entail naturalism Slagle renders this most common metaphysical view irrational As such the book advocates an important reconsideration of contemporary thought at the intersection of philosophy science and religion

Volume 19, Tome I: Kierkegaard Bibliography Peter Šajda, Jon Stewart, 2017-03-31 The long tradition of Kierkegaard studies has made it impossible for individual scholars to have a complete overview of the vast field of Kierkegaard research The large and ever increasing number of publications on Kierkegaard in the languages of the world can be simply bewildering even for experienced scholars The present work constitutes a systematic bibliography which aims to help students and researchers navigate the seemingly endless mass of publications The volume is divided into two large sections Part I which covers Tomes I V is dedicated to individual bibliographies organized according to specific language This includes extensive bibliographies of works on Kierkegaard in some 41 different languages Part II which covers Tomes VI VII is dedicated to shorter individual bibliographies organized according to specific figures who are in some way relevant for Kierkegaard The goal has been to create the most exhaustive bibliography of Kierkegaard literature possible and thus the bibliography is not limited to any specific time period but instead spans the entire history of Kierkegaard studies
