Dynamic Entrepreneurship Katja Rusinovic, 2006 Annotation The nature of immigrant entrepreneurship is changing in Dutch society Nowadays many immigrant entrepreneurs start businesses in producer and personal services instead of more traditional sectors such as retail or hotel and catering At the same time a growing number of second generation immigrants are setting up their own firms in the Netherlands These second generation immigrants born and or raised in the receiving country are following different trajectories in comparison with first generation immigrant entrepreneurs indeed displaying a move away from traditional immigrant niches Yet studies on second generation immigrant entrepreneurs remain limited in both the Dutch and international literature on this subject This study presents one of the first explicit comparisons between first and second generation self employed immigrants The embeddedness of immigrants in local and transnational networks and the dynamics of the markets in which these entrepreneurs are active are examined based on in depth interviews with immigrant entrepreneurs in Dutch cities In doing so this study provides a vivid longitudinal view of first and second generation immigrant entrepreneurs their incorporation into Dutch society their businesses and business development s This title can be previewed in Google Books <http://books.google.com/books> vid ISBN9789053569726

Dynamics of entrepreneurship under incomplete markets Chong Wang, Neng Wang, Jinqiang Yang, 2011 Abstract An entrepreneur faces substantial non diversifiable business risk and liquidity constraints both of which we refer to as frictions We show that these frictions have significant economic effects on business start up capital accumulation asset sales portfolio allocation consumption saving and business exit decisions Compared with the complete markets benchmark these frictions make entrepreneurs invest substantially less in the business consume less and allocate less to the market portfolio The endogenous exit option provides flexibility for the entrepreneur to manage downside risk The entrepreneur s optimal entry decision critically depends on the outside option the start up cost risk aversion and wealth We show that the flexibility to build up financial wealth before entering into entrepreneurship is quite valuable Finally we provide an operational framework to calculate the private equity idiosyncratic risk premium for an entrepreneurial firm and show that this premium depends on entrepreneurial wealth non diversifiable risk exposure and risk aversion [The Dynamics of Entrepreneurial](#)

Ecosystems Allan O'Connor, Colin Mason, Morgan P. Miles, David Audretsch, 2021-12-26 This book aims to provide new approaches to analysing and thinking about how entrepreneurial ecosystems develop and evolve over time as well as shed light on the relatively unexplored area of entrepreneurship ecosystem dynamics The concept of entrepreneurial ecosystems has emerged as a framework to understand the nature of places in which entrepreneurial activity flourishes Time is fundamental to the analysis of the dynamics of an entrepreneurial ecosystem New firm creation survival growth and demise all occur within a temporal context that is over and within time Systems approaches to research invariably model the influential effects of the actors and elements that shape re shape maintain shift and change the system itself An entrepreneurial ecosystem point of view therefore is inherently time dependent and provides an analytical framework that reveals how the number and diversity of entrepreneurial actors situated in a place and time influence the creation of new firms their survival growth and ultimately the stability of markets and industry in a time and place Whether for better or worse the historic and present time dimensions underpin the functioning and trajectory of entrepreneurial ecosystem performances and how they are shaped over time Each chapter in this edited volume outlines a particular perspective and or a unique case drawn from a range of countries that collectively reveal the dynamics of an ever changing entrepreneurial ecosystem The chapters were originally published as a special issue of the journal Entrepreneurship and Regional Development

The Entrepreneurship Dynamic Claudia Bird Schoonhoven, Elaine Romanelli, 2001 New organizations do not emerge full blown from the idiosyncratic minds of individual entrepreneurs Their ideas for new organizations their ability to acquire capital and other essential resources and their likelihood of survival as entrepreneurs derive from the contexts in which they live and work The Entrepreneurship Dynamic explores the conditions that prompt the founding of large numbers of new organizations or entirely new industries and the effects on existing industries economies and societies

micro and a macro phenomena and analyzing firms in the context of various socio economic models the authors explore firms creation and origins around the world their organization strategies and business models as well as the role of innovation systems and institutions in their formation and growth This comprehensive research text is vital reading for academics researchers and students of high tech and knowledge intensive entrepreneurship as well as those with an interest in industrial dynamics innovation management and public policy **Locational Dynamics of Business Services** Martin Hessels,1992 *The Dynamics of Entrepreneurial Contexts* Ulla Hytti,Robert Blackburn,Silke Tegtmeier,2018-02-23 Context is everything in entrepreneurship research This book compellingly demonstrates the ways in which the distinctive European cultural societal and geographic environments enable research into new entrepreneurial phenomena It also gives guidance as to how future research should endeavour to understand the influences of context
