Cities for People Jan Gehl, 2013-03-05 For more than forty years Jan Gehl has helped to transform urban environments around the world based on his research into the ways people actually use or could use the spaces where they live and work In this revolutionary book Gehl presents his latest work creating or recreating cityscapes on a human scale He clearly explains the methods and tools he uses to reconfigure unworkable cityscapes into the landscapes he believes they should be cities for people Taking into account changing demographics and changing lifestyles Gehl emphasizes four human issues that he sees as essential to successful city planning He explains how to develop cities that are Lively Safe Sustainable and Healthy Focusing on these issues leads Gehl to think of even the largest city on a very small scale For Gehl the urban landscape must be considered through the five human senses and experienced at the speed of walking rather than at the speed of riding in a car or bus or train This small scale view he argues is too frequently neglected in contemporary projects In a final chapter Gehl makes a plea for city planning on a human scale in the fast growing cities of developing countries A Toolbox presenting key principles overviews of methods and keyword lists concludes the book The book is extensively illustrated with over 700 photos and drawings of examples from Gehl's work around the globe

*Cities for People* Jan Gehl, 2013      How to Study Public Life Jan Gehl, Birgitte Svarre, 2013-12-04 How do we accommodate a growing urban population in a way that is sustainable equitable and inviting This question is becoming increasingly urgent to answer as we face diminishing fossil fuel resources and the effects of a changing climate while global cities continue to compete to be the most vibrant centers of culture knowledge and finance Jan Gehl has been examining this question since the 1960s when few urban designers or planners were thinking about designing cities for people But given the unpredictable complex and ephemeral nature of life in cities how can we best

design public infrastructure vital to cities for getting from place to place or staying in place for human use Studying city life and understanding the factors that encourage or discourage use is the key to designing inviting public space In *How to Study Public Life* Jan Gehl and Birgitte Svarre draw from their combined experience of over 50 years to provide a history of public life study as well as methods and tools necessary to recapture city life as an important planning dimension This type of systematic study began in earnest in the 1960s when several researchers and journalists on different continents criticized urban planning for having forgotten life in the city City life studies provide knowledge about human behavior in the built environment in an attempt to put it on an equal footing with knowledge about urban elements such as buildings and transport systems Studies can be used as input in the decision making process as part of overall planning or in designing individual projects such as streets squares or parks The original goal is still the goal today to recapture city life as an important planning dimension Anyone interested in improving city life will find inspiration tools and examples in this invaluable guide

**Life Between Buildings** Jan Gehl, 2011-01-17 The first Danish language version of this book published in 1971 was very much a protest against the functionalistic principles for planning cities and residential areas that prevailed during that period The book carried an appeal to show concern for the people who were to move about between buildings and it urged an understanding of the subtle almost indefinable but definite qualities which have always related to the interaction of people in public spaces and it pointed to the life between buildings as a dimension of architecture that needs to be carefully treated Now 40 years later many architectural trends and ideologies have passed by over the years These intervening years have also shown that the liveliness and liveability of cities and residential areas continues to be a important issue The intensity in which fine public spaces are used at this point in time as well as the greatly increased general interest in the quality of cities and their public spaces emphasises this point The character of life between buildings changes with changes in any given social context but the essential principles and quality criteria to be employed when working with life between buildings has proven to be remarkably constant Though this work over the years has been updated and revised several times this version bears little resemblance with the very early versions however there was no reason to change the basic message Take good care of the life between your buildings

**People Cities** Annie Matan, Peter Newman, 2016-11-15 Over the last 50 years architect Jan Gehl has changed the way that we think about architecture and city planning moving from the Modernist separation of uses to a human scale approach inviting people to use their cities *People Cities* tells the inside story of how Gehl learned to study urban spaces and implement his people centered approach in car dominated cities It discusses the work theory life and influence of Gehl from the perspective of those who have worked with him in cities across the globe It will inspire anyone who wants to create vibrant human scale cities and understand the ideas and work of the architect who has most influenced urban design

**Historic Cities** Jeff Cody, Francesco Siravo, 2019-07-30 This new volume in the GCI s Readings in Conservation series brings together a selection of seminal writings on the conservation of

historic cities This book the eighth in the Getty Conservation Institute's Readings in Conservation series fills a significant gap in the published literature on urban conservation This topic is distinct from both heritage conservation and urban planning despite the recent growth of urbanism worldwide no single volume has presented a comprehensive selection of these important writings until now This anthology profusely illustrated throughout is organized into eight parts covering such subjects as geographic diversity reactions to the transformation of traditional cities reading the historic city the search for contextual continuities the search for values and the challenges of sustainability With more than sixty five texts ranging from early polemics by Victor Hugo and John Ruskin to a generous selection of recent scholarship this book thoroughly addresses regions around the globe Each reading is introduced by short prefatory remarks explaining the rationale for its selection and the principal matters covered The book will serve as an easy reference for administrators professionals teachers and students faced with the day to day challenges confronting the historic city under siege by rampant development

and organised labour The third industrial revolution was powered by introduction of industrial automation The fourth industrial revolution involves introduction of a combination of technologies to enable connected intelligence and industrial autonomy The introduction of Industry 4.0 dramatically changes the landscape of innovation and the way design the engine of innovation is carried out The theme of ICoRD 23 Design in the Era of Industry 4.0 explores how Industry 4.0 concepts and technologies influence the way design is conducted and how methods tools and approaches for supporting design can take advantage of this transformational change that is sweeping across the world The book is of interest to researchers professionals and entrepreneurs working in the areas on industrial design manufacturing consumer goods and industrial management who are interested in the new and emerging methods and tools for design of new products systems and services

Temporary Appropriation in Cities Alessandro Melis, Jose Antonio Lara-Hernandez, James Thompson, 2019-12-12 This book conceptualises and illustrates temporary appropriation as an urban phenomenon exploring its contributions to citizenship urban social sustainability and urban health It explains how some forms of appropriation can be subversive existing in a grey area between legal and illegal activities in the city The book explores the complex and the multi scalar nature of temporary appropriation and touches on its relationship to issues such as sustainability and building re use culture inclusivity including socio spatial inclusion streetscape design homelessness and regulations controlling the use of public spaces The book focuses on temporary appropriation as a necessity of adapting human needs in a city highlighting the flexibility that is needed within urban planning and the further research that should be undertaken in this area The book utilises case studies of Auckland Algiers and Mexico City and other cities with diverse cultural and historical backgrounds to explore how planning design and development can occur whilst maintaining community diversity and resilience Since urban populations are certain to grow further this is a key topic for understanding urban dynamics and this book will be of interest to academics and practitioners alike

*Life Between Buildings* Jan Gehl, 2011 *Life Between Buildings* is Jan Gehl's classic text on the importance of designing urban public space with the fundamental desires of people as guiding principles The book describes essential elements that contribute to people's enjoyment of spaces in the public realm These elements remain remarkably constant even as architectural styles go in and out of fashion and the character of the life between buildings changes

**Cities**  
**People Planet** Herbert Girardet, 2004-12-15 Publisher description  
*New City Life* Jan Gehl, 2006  
**Soft City** David Sim, 2019-08-20 Imagine waking up to the gentle noises of the city and moving through your day with complete confidence that you will get where you need to go quickly and efficiently *Soft City* is about ease and comfort where density has a human dimension adapting to our ever changing needs nurturing relationships and accommodating the pleasures of everyday life How do we move from the current reality in most cities separated uses and lengthy commutes in single occupancy vehicles that drain human environmental and community resources to support a soft city approach In *Soft City* David Sim partner and creative director at Gehl shows how this is possible presenting ideas and graphic examples from around the globe He draws

from his vast design experience to make a case for a dense and diverse built environment at a human scale which he presents through a series of observations of older and newer places and a range of simple built phenomena some traditional and some totally new inventions Sim shows that increasing density is not enough The soft city must consider the organization and layout of the built environment for more fluid movement and comfort a diversity of building types and thoughtful design to ensure a sustainable urban environment and society Soft City begins with the big ideas of happiness and quality of life and then shows how they are tied to the way we live The heart of the book is highly visual and shows the building blocks for neighborhoods building types and their organization and orientation how we can get along as we get around a city and living with the weather As every citizen deals with the reality of a changing climate Soft City explores how the built environment can adapt and respond Soft City offers inspiration ideas and guidance for anyone interested in city building Sim shows how to make any city more efficient more livable and better connected to the environment
