Clinical Case Studies In Home Health Care:

Clinical Case Studies in Home Health Care Leslie Neal-Boylan, 2011-08-30 Home health care is an important aspect of community health and a growing area of healthcare services. *Clinical Case Studies in Home Health Care* uses a case-based approach to provide home healthcare professionals, educators, and students with a useful tool for thoughtful, holistic care. The book begins with a thorough and accessible introduction to the principles of home health care, including a discussion of supporting theoretical frameworks and information on managing complexities, transitioning patients to home care, and preparation for the home visit. Subsequent sections are comprised entirely of case studies organized by body system. Though cases are diverse in content, each is presented in a consistent manner, incorporating relevant data about the patient and caregivers and the approach to patient care and promoting a logical approach to patient presentation. Cases also include helpful tips about reimbursement practices, cultural competence, community resources, and rehabilitation needs. **Clinical**

and Uninsured Leslie Neal-Boylan, 2022-10-24 *CARING FOR THE DISPLACED AND UNINSURED* An essential text to understanding key aspects of caring for uninsured people from underserved populations. *Caring for the Displaced and Uninsured* presents clinical case studies that focus on the issues faced primarily by patients who are uninsured, self-paying, or are visiting from their home countries. While addressing the clinical aspects of primary care for a variety of conditions, these case studies go a step further to confront the issues faced by patients who seek care in clinics for the uninsured. Each case highlights the challenges presented by cultural language and economic differences to providing high-quality care, in particular for those whose jobs negatively affect their health, such as through musculoskeletal pain, neurological problems, prolonged standing, depression, or anxiety about feeding and housing their families. The cases explore how the healthcare provider approaches care with insufficient resources for patients who may have fled torture and violence, poverty, and homelessness to face new challenges in the United States. The healthcare provider plays a key role in the adjustment of people seeking a better life for themselves and their families. *Caring for the Displaced and Uninsured* addresses issues

related to family medication food housing finances work trauma mental health specialty access delayed screening visitors and immigration How to think in broader terms when treating immigrant or uninsured patients The nuances of treating patients who have lived outside of their home country apart from their families for many years Tips for providing quality healthcare within the parameters that currently exist in the healthcare system This text provides valuable insight and perspective for nursing and healthcare students particularly those taking community health classes and classes that focus on uninsured and underserved populations
