Clinical Optics:

Clinical Optics Troy E. Fannin, Theodore Grosvenor, 2013-10-22 Clinical Optics is intended primarily for use by optometry students though it could also prove useful for the training of optometric technicians and dispensing opticians This book is organized into thirteen chapters These chapters cover most aspects of ophthalmic optics or clinical optics including the design and dispensing of eyewear the types for lenses suitable for correcting high refractive errors the optical principles governing low vision lenses and the importance of absorptive lenses and lens coatings for eye protection against radiation This book will be of interest to optometry students and to those involved in the training of optometric technicians and dispensing opticians

Clinical Optics Andrew R. Elkington, Helena J. Frank, Michael J. Greaney, 1999-08-25 Written to help trainee ophthalmologists this textbook is now the recognised text on optics for the examinations of the Royal College of Ophthalmologists and the Royal Surgical Colleges It approaches the subject from first principles and assumes no previous knowledge of optics The book has been kept as simple as possible and is liberally complemented with diagrams designed to be easily understood and memorised Only the most fundamental and clinically useful mathematical formulae are quoted and the optical principles are applied to clinical situations Ophthalmology examinations have changed substantially since the last edition was written and a total rewrite of this essential guide has become necessary The third edition has been made more comprehensive and detailed to keep up with these changes and incorporates three new chapters refractive surgery contact lenses and lasers Other new material includes photometry visual acuity contrast sensitivity colour vision absorptive lenses fluorescence ultrasound and the specular microscope

Clinical Optics and Refraction Andrew Keirl, Caroline Christie, 2007-10-10 It provides a comprehensive and clinically based guide to visual optics With its suggested routines and numerous examples this new book offers a straightforward how to approach to the understanding of clinical optics refraction and contact lens optics Designed for easy access it presents information in a concise format that highlights key need to know points Part 1 addresses the basic visual optics of the eye along with emmetropia ametropia and the correction of ametropia with spectacle lenses Part 2 turns to the optics of contact lenses and the use of contact lenses in vision correction Numerous worked examples based on real examination questions Practical and user friendly text Over 190 clear line diagrams An essential passport to examination success and a valuable quick reference for practitioners
