Unger,1994 9780851775609 Synopsis coming soon Trade, Travel, and Exploration in the Middle Ages John Block Friedman,Kristen Mossler Figg,2013-07-04 Trade Travel and Exploration An Encyclopedia is a reference book that covers the peoples places technologies and intellectual concepts that contributed to trade travel and exploration during the Middle Ages from the years A D 525 to 1492 **England's Medieval Navy, 1066-1509** Susan Rose,2013-10-06 Rose looks at every aspect of English naval power in the Medieval period an excellent study of a somewhat neglected period of English naval history History of War We are accustomed to think of England in terms of Shakespeare s precious stone set in a silver sea safe behind its watery ramparts with its naval strength resisting all invaders To the English of an earlier period from the 8th to the 11th centuries such a notion would have seemed ridiculous The sea rather than being a defensive wall was a highway by which successive waves of invaders arrived bringing destruction and fear in their wake Deploying a wide range of sources this new book looks at how English kings after the Norman Conquest learnt to use the Navy of England a term which at this time included all vessels whether Royal or private and no matter what their ostensible purpose to increase the safety and prosperity of the kingdom The design and building of ships and harbour facilities the development of navigation ship handling and the world of the seaman are all described while comparisons with the navies of England s closest neighbours with particular focus on France and Scotland are made and notable battles including Damme Dover Sluys and La Rochelle included to explain the development of battle tactics and the use of arms during the period The author shows in this lucid and enlightening narrative how the unspoken aim of successive monarchs was to begin to build the wall of England its naval defences with a success which was to become so apparent in later centuries History of Technology Volume 33 Ian Inkster,2017-06-01 While political and social historians have made great progress in trying to understand the making of modern Greece by studying politics and power struggles little attention has been given TO the co evolution of the Greek state and the technologies that were developed during this period This volume HELPS fills this gap exploring the formation of the Greek state and the construction of modern Greece through the lens of the history of technology and industry The contributors look at the role of engineering institutions the press and of infrastructure technological networks in promoting specific technocratic ideals and legitimizing social roles for the engineers of the period The volume as a whole offers new insights into the way that engineering culture institutional reforms and infrastructures contributed to the making of modern Greece Special Issue History of Technology in Greece from the Early 19th to 21st Century Edited by Stathis Arapostathis and Aristotelis Tympas *Technology, Disease, and Colonial Conquests, Sixteenth to Eighteenth Centuries* George Raudzens,2003 This study consists of eight essays critical of the currently dominant guns and germs theories in the historiography of European colonial conquest causes Other methods of conquest notably communication control were as vital

as firepower and disease importation and motives were often more important than methods

Tudor Warship Mary Rose
 Douglas McElvogue, 2020-02-20 The great warship the Mary Rose was built between 1509 and 1511 and served 34 years in Henry VIII's navy before catastrophically sinking in the Battle of the Solent on 19 July 1545. A fighting platform and sailing ship, she was the pride of the Tudor fleet. Yet her memory passed into undeserved oblivion until the remains of this magnificent flagship were dramatically raised to the surface in 1982 after 437 years at the bottom of the Solent. Part of the bestselling Conway Anatomy of The Ship series, Tudor Warship Mary Rose provides the finest possible graphical representation of the Mary Rose. Illustrated with a complete set of scale drawings, this book contains technical plans as well as explanatory views, all with fully descriptive keys. Douglas McElvogue uses archaeological techniques to trace the development and eventful career of Henry VIII's gunship while placing it in the context of longer term advances in ship construction. This volume features the first full archaeological reconstruction of the Mary Rose as she would have appeared when built and when she sank. The concepts behind the building of the ship, along with consideration of the materials used and her fitting out and manning. The ship's ordnance, including muzzle loaders, breech loaders, firearms, bows, staff weapons, bladed weapons, and fire pots. Analysis of the contemporary descriptions of the Mary Rose's sailing characteristics and ship handling, whether general sailing, heavy weather sailing, anchoring, mooring, stemming the tide, or riding out storms. A service history of the Mary Rose, examining the campaigns of the vessel, the battles she was involved in, when she held station in the Channel, and the periods in which she was laid up.

The Routledge Companion to Marine and Maritime Worlds 1400-1800
 Claire Jowitt, Craig Lambert, Steve Mentz, 2020-05-21 This book has been nominated for The Mountbatten Award for Best Book in the Maritime Media Awards 2021. The Routledge Companion to Marine and Maritime Worlds 1400-1800 explores early modern maritime history, culture, and the current state of the research and approaches taken by experts in the field. Ranging from cartography to poetry and decorative design to naval warfare, the book shows how once traditional and often Euro-chauvinistic depictions of oceanic mastery during the early modern period have been replaced by newer global ideas. This comprehensive volume challenges underlying assumptions by balancing its assessment of the consequences and accomplishments of European navigators in the era of Columbus, da Gama, and Magellan with an awareness of the sophistication and maritime expertise in Asia, the Arab world, and the Americas. By imparting riveting new stories and global perceptions of maritime history and culture, the contributors provide readers with fresh insights concerning early modern entanglements between humans and the vast unpredictable ocean. With maritime studies growing and the ocean's health in decline, this volume is essential reading for academics and students interested in the historicization of the ocean and the ways early modern cultures both conceptualized and utilized seas.

Ottoman naval technology underwent a transformation under the rule of Sultan Selim III New types of sailing warships such as two and three decked galleons frigates and corvettes began to dominate the Ottoman fleet rendering the galley type oared ships obsolete This period saw technological innovations such as the adoption of the systematic copper sheathing of the hulls and bottoms of Ottoman warships from 1792/93 onwards and the construction of the first dry dock in the Golden Horn The changing face of the Ottoman Navy was facilitated by the influence of the British Swedish and French in modernising both the shipbuilding sector and the conduct of naval warfare Through such measures as training Ottoman shipbuilders heavy reliance on help from foreign powers gave way to a new trajectory of modernization Using this evidence Zorlu argues that although the Ottoman Empire was a major and modern independent power in this period some technological dependence on Europe remained
