G. Hassan,1996-11-11 A textbook for students at undergraduate and equivalent level taking courses on the built environment It will appeal in particular to second level students of construction building surveying quantity surveying and architecture While covering the full range of topics normally associated with building services the author focuses on the treatment of energy within the built environment as this is held to be one of the chief concerns of building consultants building and facilities managers inspectors and engineers **Accounting and Finance for Building and Surveying** Alan R. Jennings,1995-05-10 Intended for undergraduate and equivalent students of building building surveying construction economics and quantity surveying this book gives an accessible and clear explanation of accounting terminology concepts practices and procedures The book is divided into two parts The first eight chapters deal with financial reporting and analysis covering such topics as business finance the financial position and the balance sheet profit and loss cash flow and the interpretation of financial statements The second part consists of a further nine chapters on management planning and control practices Here topics such as costs overhead attribution cost volume profit analysis and budgeting are discussed among others **Introduction to Valuation** David Richmond,1994-11-11 For the third edition the author has revised his popular text and enlarged the chapters on the valuation of freehold and leasehold interests discounted cash flow techniques and methods of valuation An additional chapter on computer applications has been provided This is a valuable text for first stage valuation examinations for professional degree and diploma courses and includes fully worked examples and self test questions Building Quantities Explained Ivor H. Seeley,Roger Winfield,1999-11-11 A long established text that aims to meet the needs of students studying building measurement in the early years of quantity surveying and building degree courses It contains a careful selection of 28 worked examples embracing all the principal building elements and including alternative constructional methods to illustrate a range of approaches *Construction Marketing* Richard Pettinger,1998-11-11 This book covers the whole range of marketing principles skills and knowledge that the modern construction manager from whatever discipline or profession within the industry requires to generate effective and profitable business While aimed primarily at students in the later years of degree diploma and professional courses it will also appeal to students in related disciplines and those following postgraduate and post qualification courses The approach underlines the importance of adopting a proactive attitude towards the marketing of a company s services in the construction industry It reflects the reality of the transformation that has taken place over the past twenty years where there has been a shift from a highly protected domestic industry to an unprotected global industry The already huge and increasing pool of expertise in the field means that there is much greater choice available to clients and and potential clients The choice of contractor is therefore going to be made increasingly on the basis of factors other than pure expertise Therein lies the importance of marketing Factors such as price quality value volume time client satisfaction and confidence all come into play and these are

presented and differentiated through marketing The book covers all the principles of marketing including strategy marketing campaigns product and service price promotion access and research It also deals with client perceptions confidence expectations and understanding The critical question of operating in a fully globalised industry is also addressed **Urban Land Economics and Public Policy** Paul N. Balchin, Gregory H. Bull, Jeffrey L. Kieve, 1995-11-11 This revised and reset new fifth edition generally follows the structure of the previous edition although some of the material of the earlier chapters has been rearranged in addition to being updated and extended A new feature of this edition is the allocation of a complete chapter to examining the problems of urban decline and renewal Here the economic and social problems are discussed within the framework of current issues in urban policy local government and planning The book will appeal as a basic textbook for undergraduate students of estate management land economics building surveying and quantity surveying It will be valuable to students taking degree or equivalent courses in urban economics urban geography or town planning it will also appeal to those preparing for RICS and RTPI examinations **Building Procurement** Alan Turner, 1997-11-11 This second edition of Building Procurement has been revised to take into account recent developments in procurement such as the Private Finance initiative as well as some of the recommendations in the Latham Report and its working groups The author sets out the basics of the building process the principal players along with general conventions and background information on building contracts and conditions of appointment for consultants Fourteen case studies based on real projects principally from the author's experience are included to illustrate the progressive nature of procurement in practice Examples of good and bad procurement decisions are given in the studies with a postscript and comment on the reasons for success or failure **Property Management** Gordonington, 1997-11-11 Intended for advanced students and practitioners this book gives an up to date presentation of property management as practised by a leading company BAA plc A key aim of the book is to show the benefits to be obtained from building a business culture based on service to the customer This may be achieved by due attention to communication leadership measurement benchmarking and accountability **Applied Valuation** Diane Butler, 1995-06-12 The text of the second edition of Applied Valuation has been completely revised and largely rewritten As before a selection of typical examination questions is presented together with suggested answers but additional questions have now been provided in each subject area To aid the reader's understanding of underlying principles the explanations accompanying each suggested answer as well as the introductions to each section have been greatly extended Questions and answers are arranged separately in subject areas with a chapter devoted to each **Building Maintenance** Ivor H. Seeley, 1987-11-20 A comprehensive up to date and illustrated exposition of building maintenance in all its aspects to serve the needs of building surveyors and other professionals involved in this activity and building surveying and architectural students It shows the great importance of properly maintaining buildings and the advisability of providing adequate feedback to the design team All the main building defects are described and illustrated and the appropriate

remedial measures examined Alterations and improvements to buildings and the specifying measurement pricing tendering and contractual procedures are all examined described and illustrated In addition the planning and financing execution and supervision of maintenance work receive full consideration

Principles of Property Investment and Pricing Will Fraser, 1993-11-11 This book is a comprehensive analysis of property investment and the market's determination of commercial property values and investment performance The author examines the economic forces that operate in the property market by placing property in the context of the overall investment market and the local national and international economies Relevant concepts and principles of economics investment and finance are identified these are then used to explain the operation of the property market and property price determination The text begins with a study of the stock market identifying the principles and forces which explain the price determination of stocks and shares These principles are then applied to commercial property investments and a simple theory is developed The three major sectors of the property market letting development and investment are then analysed in depth and the pricing theory is reviewed After an examination of the influence of government intervention the subject is synthesised by detailed studies of three of the most turbulent periods in the history of the post Second World War property market in the UK In this second edition both the text and illustrative examples have been updated The theory of the market's determination of rental values and yields have been substantially revised and developed A new chapter discussing the 1980s property boom and the 1990s collapse has been added
