Civilization The Six Killer Apps Of Western Power:

Civilization Niall Ferguson, 2011-11-01 From the bestselling author of *The Ascent of Money* and *The Square and the Tower* A dazzling history of Western ideas *The Economist* Mr Ferguson tells his story with characteristic verve and an eye for the felicitous phrase *Wall Street Journal* Written with vitality and verve a tour de force Boston Globe Western civilization's rise to global dominance is the single most important historical phenomenon of the past five centuries How did the West overtake its Eastern rivals And has the zenith of Western power now passed Acclaimed historian Niall Ferguson argues that beginning in the fifteenth century the West developed six powerful new concepts or killer applications competition science the rule of law modern medicine consumerism and the work ethic that the Rest lacked allowing it to surge past all other competitors Yet now Ferguson shows how the Rest have downloaded the killer apps the West once monopolized while the West has literally lost faith in itself *Chronicling* the rise and fall of empires alongside clashes and fusions of civilizations *Civilization* The West and the Rest recasts world history with force and wit Boldly argued and teeming with memorable characters this is Ferguson at his very best

Go West! Bernhard Hemetsberger, Andreas Oberdorf, 2025-03-31 The West is a central concept in public discourse but its meaning is often unclear and open to manifold interpretations and ascriptions of belonging and exclusion Who is part of the West When and where is it located How did its meaning change over space and time Who are the mediators of the West and what is their interest in terms of culture and education The West is often used without any critical questioning though This is also reflected in history of education research especially with focus on transnational or transatlantic issues Here the West is a sort of container term or fuzzy concept that can refer to a variety of historical entanglements and cultural transfers in school systems and education but also to conflicts and crises accordingly This book aims to stimulate a critical reflection and debate on ideas of the West in the history of education by gathering scholars from various fields of historical research With a reflexive historical distance to current political incidents in which ideas of the West are revived the contributions in this book are intended to enable readers to evaluate representations of the West in current academic or public discourses and debates alike

Ruin and Renewal Paul Betts, 2020-11-17 Winner of the American Philosophical Society's 2021 Jacques Barzun Prize in Cultural History From an award winning historian a panoramic account of Europe after the depravity of World War II In 1945 Europe lay in ruins Some fifty million people were dead and millions more languished in physical and moral disarray The devastation of World War II was unprecedented in character as well as in scale Unlike the First World War the second blurred the line between soldier and civilian inflicting untold horrors on people from all walks of life A continent that had previously considered itself the very measure of civilization for the world had turned into its barbaric opposite Reconstruction then was a matter of turning Europe's civilizing mission inward In this magisterial work Oxford historian Paul Betts describes how this effort found expression in humanitarian relief work the prosecution of war crimes against humanity a resurgent Catholic Church peace campaigns

expanded welfare policies renewed global engagement and numerous efforts to salvage damaged cultural traditions

Authoritative and sweeping *Ruin and Renewal* is essential reading for anyone hoping to understand how Europe was transformed after the destruction of World War II Engaging Transculturality Laila Abu-Er-Rub, Christiane Brosius, Sebastian Meurer, Diamantis Panagiotopoulos, Susan Richter, 2019-03-07 *Engaging Transculturality* is an extensive and comprehensive survey of the rapidly developing field of transcultural studies In this volume the reflections of a large and interdisciplinary array of scholars have been brought together to provide an extensive source of regional and trans regional competencies and a systematic and critical discussion of the field's central methodological concepts and terms Based on a wide range of case studies the book is divided into twenty seven chapters across which cultural social and political issues relating to transculturality from Antiquity to today and within both Asian and European regions are explored Key terms related to the field of transculturality are also discussed within each chapter and the rich variety of approaches provided by the contributing authors offer the reader an expansive look into the field of transculturality Offering a wealth of expertise and equipped with a selection of illustrations this book will be of interest to scholars and students from a variety of fields within the Humanities and Social Sciences **Roland Allen** Steven Richard Rutt, 2018-01-01 The book is an analysis of the context and development of Roland Allen's missiology with a specific focus on what shaped his missionary ecclesiology Germany and 'The West' Riccardo Bavaj, Martina Steber, 2017-06 The West is a central idea in German public discourse yet historians know surprisingly little about the evolution of the concept Contrary to common assumptions this volume argues that the German concept of the West was not born in the twentieth century but can be traced from a much earlier time In the nineteenth century the West became associated with notions of progress liberty civilization and modernity It signified the future through the opposition to antonyms such as Russia and the East and was deployed as a tool for forging German identities Examining the shifting meanings political uses and transnational circulations of the idea of the West sheds new light on German intellectual history from the post Napoleonic era to the Cold War *The Herald* , 2012 Transilvania , 2018 *Summary & Study Guide - Civilization* Lee Tang, 2019-05-02 Why does Western civilization dominate the rest of the world This book is a summary of *Civilization The West and the Rest* by Niall Ferguson The central question is Why did the West dominate the Rest and not vice versa The book describes six concepts that the West has developed that allow them to leap ahead of the Rest unleashing the Industrial Revolution and increasing human productivity Six hundred years ago Ming China and Ottoman Turkey dominated the world civilizations while Western Europe was a miserable backwater devastated by incessant war and disease But today Western civilization has risen to global dominance How has the West overtaken its Eastern rivals in the past 500 or so years In *Civilization* Niall Ferguson argues that beginning in the 15th century the West developed six powerful concepts that the Rest lacked competition science property rights medicine consumerism and work ethic These six killer apps allowed the West to leap ahead of the Rest unleashing the Industrial Revolution and increasing

human productivity Yet now the days of Western predominance are numbered because the Rest are adopting these same concepts while the West has lost faith in its own civilization Read this book and learn how these six killer apps help the West dominate the world This guide includes Book Summary helps you understand the key concepts Online Videos cover the concepts in more depth Value added from this guide Save time Understand key concepts Expand your knowledge
