Class Bureaucracy And Schools The Illusion Of Educational Change In America:

Class, Bureaucracy, and Schools Michael B. Katz, 1971 Critique of the urban area educational system of the USA analyses the historical failure of educational reform in 19th century Boston assesses current trends and concludes that bureaucracy is the dominant structure in urban education References **Class, Bureaucracy and Schools** Michael B. Katz, 1971

Schools and Society Jeanne H. Ballantine, Joan Z. Spade, 2008 Presents the most recent theories research terms concepts ideas and histories on educational leadership and school administration as taught in preparation programs and practiced in schools and colleges today **The Other Struggle for Equal Schools** Rubén Donato, 1997-01-01 Examining the Mexican American struggle for equal education during the 1960s and 1970s in the Southwest in general and in a California community in particular Donato challenges conventional wisdom that Mexican Americans were passive victims accepting their educational fates He looks at how Mexican American parents confronted the relative tranquility of school governance how educators responded to increasing numbers of Mexican Americans in schools how school officials viewed problems faced by Mexican American children and why educators chose specific remedies Finally he examines how federal state and local educational policies corresponded with the desires of the Mexican American community *Parents and Schools* William W. Cutler, 2000-06-15 Who holds ultimate authority for the education of America's children teachers or parents Although the relationship between home and school has changed dramatically over the decades William Cutler's fascinating history argues that it has always been a political one and his book uncovers for the first time how and why the balance of power has shifted over time Starting with parental dominance in the mid nineteenth century Cutler chronicles how schools growing bureaucratization and professionalization allowed educators to gain increasing control over the schooling and lives of the children they taught Central to his story is the role of parent teacher associations which helped transform an adversarial relationship into a collaborative one Yet parents have also been controlled by educators through PTAs leading to the perception that they are company unions Cutler shows how in the 1920s and 1930s schools expanded their responsibility for children's well being outside the classroom These efforts sowed the seeds for later conflict as schools came to be held accountable for solving society's problems Finally he brings the reader into recent decades in which a breakdown of trust racial tension and parents rights have taken the story full circle with parents and schools once again at odds Cutler's book is an invaluable guide to understanding how parent teacher cooperation which is essential for our children's educational success might be achieved **Controlling Public Education** Kathryn A. McDermott, 1999 Most Americans believe that local school districts are the only means by which citizens may exercise control over public education Kathryn McDermott argues to the contrary that existing local institutions are no longer sufficient for achieving either equity or democratic governance Not only is local control inequitable it also fails to live up to its reputation for guaranteeing public participation and citizen influence Drawing upon democratic theory and the results of field research in New Haven Connecticut and three

suburbs McDermott contends that our educational system can be made more democratic by centralizing control over funding while decentralizing most authority over schools to the level of schools themselves while enacting public school choice controlled for racial balance To many people in Connecticut and elsewhere the tension between equal opportunity for all students and local control of public education seems impossible to resolve In 1996 the Connecticut Supreme Court ruled in *Sheff v O Neill* that local control produces unconstitutional segregation of public schools Nearly all of the state's 169 towns operate their own public schools and like the towns they serve the schools are generally homogeneous with respect to race and socioeconomic class In the *Sheff* ruling the court declared that making school districts coterminous with town lines is the single most important factor contributing to the present concentration of racial and ethnic minorities in the Hartford public school system At the same time the court also acknowledged that the town based school system presently furthers the legitimate nonracial interests of permitting considerable local control and accountability in educational matters In Connecticut and elsewhere it has often seemed necessary to choose between local control and equity in public education and local control has almost always won McDermott argues that rather than seeing local control and equity as conflicting goals policymakers should regard them as equally important components of democracy in public education In her view a truly democratic system of education should both encourage citizen participation in school governance and contribute to the formation and maintenance of a social order in which equality of opportunity prevails over hierarchies of privilege Centralizing distribution of resources and using controlled choice to end racial isolation would provide greater equality of opportunity while decentralizing management of schools would expand citizen participation McDermott's conclusions break new ground in our understanding of local school governance itself and call into question the conventional wisdom about local participation These findings should interest those who study school governance and reform especially in an urban setting as well as policy makers administrators teachers students and citizens eager to improve their schools

Moral Education in America's Schools Thomas C. Hunt, Monalisa McCurry-Mullins, 2006-03-01 This book is not a comprehensive history of moral education in American schools Rather it is an episodic history that deals with selected periods movements and individuals throughout the course of American education history from the time of colonial Massachusetts in the 17th century up to present times It is almost entirely devoted to public schools It is a tale that is fraught with friction and controversy even legal challenge Given the nature of the topic and the passion with which it has been and is currently viewed it will ever be thus

Urban Education in the 19th Century D.A. Reeder, 2018-01-02 First published in 1977 *Urban Education in the 19th Century* is a collection based on the conference papers of the annual 1976 conference for the History of Education Society The book illustrates a variety of ways of elucidating the connections between education and the city mainly in nineteenth century Britain Essays cover political geographical demographic and socio structural aspects of urbanization There is an emphasis on comparative studies of urban educational developments and attention is paid to the perceptions of the

nineteenth century city and its problems especially for child life as well as to the realities of urban change **School Reform, Corporate Style** Dorothy Shipps, 2006 Like other big city school systems Chicago has been repeatedly reformed over the last century Yet its schools have fallen far short of citizens expectations and left a gap between the performances of white and minority students Many blame the educational establishment for resisting change Other critics argue that reform occurs too often still others claim it comes not often enough Dorothy Shipps reappraises the tumultuous history of educational progress in Chicago revealing that the persistent lack of improvement is due not to the extent but rather the type of reform Throughout the twentieth century managerial reorganizations initiated by the business community repeatedly altered the governance structure of schools as well as the relationships of teachers to children and parents but brought little improvement while other more promising reform models were either resisted or crowded out Shipps chronicles how Chicago's corporate actors led abetted or restrained nearly every attempt to transform the city's school system then asks whether schools might be better reformed by others To show why city schools have failed urban children so badly she traces Chicago's reform history over four political eras revealing how corporate power was instrumental in designing and revamping the system Her narrative encompasses the formative era of 1880-1930 when teachers unions moderated business plans previously unexplored business activism from 1930 to 1980 when civil rights dominated school reform and the decentralization of the 1980s She also covers the uneasy cooperation among business associations in the 1990s to install the mayor as head of the school system a governing regime now challenged by privatization advocates Business people may be too wedded to a stunted view of educators to forge a productive partnership for change Unionized teachers bridle at the second class status accorded them by managers If reform is to reach deeply into classrooms Shipps concludes it might well require a new coalition of teachers unions and parents to create a fresh agenda that supersedes corporate interests This study clearly shows that in Chicago as elsewhere urban schooling is intertwined with politics and power By reviewing more than a century of corporate efforts to make education work Shipps makes a strong case that it's high time to look elsewhere perhaps to educators themselves for new leadership Divergent Paths Marc Egnal, 1996 Why are some countries without an apparent abundance of natural resources such as Japan economic success stories while others languish in the doldrums of slow growth In this comprehensive look at North American economic history Marc Egnal argues that culture and institutions play an integral role in determining economic outcome He focuses his examination on the eight colonies of the North five colonies of the South which together made up the original thirteen states and French Canada Using census data diaries travelers accounts and current scholarship Egnal systematically explores how institutions such as slavery in the South and the seigneurial system in French Canada and cultural arenas such as religion literacy entrepreneurial spirit and intellectual activity influenced development He seeks to answer why three societies with similar standards of living in 1750 became so dissimilar in development By the mid nineteenth century the northern states had surged ahead in growth and this gap

continued to widen into the twentieth century Egnal argues that culture and institutions allowed this growth in the North not resources or government policies Both the South and French Canada stressed hierarchy and social order more than the drive for wealth Rarely have such parallels been drawn between these two societies Complete numerous helpful appendices figures tables and maps Divergent Paths is a rich source of unique perspectives on economic development with strong implications for emerging societies **Handbook of Research on Curriculum** Philip Wesley Jackson, American Educational Research Association, 1992 Provides information about a wide range of curricular issues affecting elementary and high school education exploring methodological and conceptual issues looking at the forces that shape the curriculum studying the impact of the curriculum on special groups of students and discussing conventional subjects like reading and math
