Code-switching Between Structural and Sociolinguistic Perspectives Gerald Stell, Kofi Yakpo, 2015-02-17 The study of code switching has been carried out from linguistic psycholinguistic and sociolinguistic perspectives largely in isolation from each other This volume attempts to unite these three research strands by placing at the centre of the enquiry the role played by social factors in the occurrence forms and outcomes of code switching The contributions in this volume are divided into three parts code switching between cognition and socio pragmatics multilingual interaction and identity and code switching and social structure The case studies represent contact settings on five continents and feature languages with diverse linguistic affiliations They are predictive and descriptive in their research goals and rely on experimental or naturalistic data But they share the common goal of seeking to explain how social structures ideologies and identity impact on the grammatical and conversational features of code switching and language mixing and on the emergence of mixed languages Given its scope this volume is a significant addition to the empirical and theoretical foundations of the study of code switching It is also of relevance to the general debate on the inter relationships between language and society One Speaker, Two Languages Lesley Milroy, Pieter Muysken, 1995-08-17 Code switching the alternating use of several languages by bilingual speakers does not usually indicate lack of competence on the part of the speaker in any of the languages concerned but results from complex bilingual skills The reasons why people switch their codes are as varied as the directions from which linguists approach this issue and raise many sociological psychological and grammatical questions This volume of essays by leading scholars brings together the main strands of current research in four major areas the policy implications of code switching in specific institutional and community settings the perspective of social theory on code switching as a form of speech behaviour in particular social contexts the grammatical analysis of code switching including the factors that constrain switching even within a sentence and the implications of code switching in bilingual processing and development

Language Mixing and Code-Switching in Writing Mark Sebba, Shahrzad Mahootian, Carla Jonsson, 2012-05-22 Code switching or the alternation of languages by bilinguals has attracted an enormous amount of attention from researchers However most research has focused on spoken language and the resultant theoretical frameworks have been based on spoken code switching This volume presents a collection of new work on the alternation of languages in written form Written language alternation has existed since ancient times It is present today in a great deal of traditional media and also exists in newer less regulated forms such as email SMS messages and blogs Chapters in this volume cover both historical and contemporary language mixing practices in a large range of language pairs and multilingual communities The research collected here explores diverse approaches including corpus linguistics Critical Discourse Analysis literacy studies ethnography and analyses of the visual textual aspects of written data Each chapter based on empirical research of

multilingual writing presents methodological approaches as models for other researchers New perspectives developed in this book include analysis specific to written rather than spoken discourse approaches from the new literacy studies treating mixed language literacy from a practice perspective a focus on both traditional and new media types and the semiotics of both text and the visual environment

Code-switching Penelope Gardner-Chloros, 2009-06-25 An interdisciplinary overview of code switching whereby bilingual speakers switch between different languages or language varieties

Social Motivations for Codeswitching Carol Myers-Scotton, 2023 Discusses codeswitching the use of more than one language in a conversation Using data from multilingual African contexts the author suggests that speakers change languages to change the tenor of the conversation and convey warmth or anger solidarity or power by their linguistic choice

Code-Switching in Conversation Peter Auer, 2013-07-04 Code Switching the alternating use of two or more languages ation has become an increasingly topical and important field of research Now available in paperback Code Switching in Conversation brings together contributions from a wide variety of sociolinguistics settings in which the phenomenon is observed It addresses not only the structure and the function but also the ideological values of such bilingual behaviour The contributors question many views of code switching on the empirical basis of many European and non European contexts By bringing together linguistics anthropological and socio psychological research they move towards a more realistic conception of bilingual conversation action

The Cambridge Handbook of Linguistic Code-switching Barbara E. Bullock, Almeida Jacqueline Toribio, 2009-03-05 Code switching the alternating use of two languages in the same stretch of discourse by a bilingual speaker is a dominant topic in the study of bilingualism and a phenomenon that generates a great deal of pointed discussion in the public domain This handbook provides the most comprehensive guide to this bilingual phenomenon to date Drawing on empirical data from a wide range of language pairings the leading researchers in the study of bilingualism examine the linguistic social and cognitive implications of code switching in up to date and accessible survey chapters The Cambridge Handbook of Linguistic Code switching will serve as a vital resource for advanced undergraduate and graduate students as a wide ranging overview for linguists psychologists and speech scientists and as an informative guide for educators interested in bilingual speech practices

Code-Switching Mareike L. Keller, 2020-01-03 This book systematically discusses the link between bilingual language production and its manifestation in historical documents drawing together two branches of linguistics which have much in common but are traditionally dealt with separately By combining the study of historical mixed texts with the principles of modern code switching and bilingualism research the author argues that the cognitive processes underpinning the human capacity to produce mixed utterances have remained unchanged throughout history even as the languages themselves are constantly changing This book will be of interest to scholars of historical linguistics syntactic theory particularly generative grammar language variation and change

Plurilingual Code-switching Between Standard and Local

Varieties Dino Selvaggi, 2018 This book presents a comparative study on plurilingual code switching CS in Italy Croatia and Scotland UK based on Italian in contact with four standard varieties Spanish English Philipino and Croatian and five non standard varieties Arbereshe Occitan Calabrese Istrovenetian and Chakavski It intends to fill a gap in the literature by proposing an interdisciplinary perspective as most studies are concentrated on bilingual CS and are grounded just in one approach mostly sociolinguistic or psycholinguistic it also presents a new mixed key for CS data analysis going beyond the traditional neat dichotomies defining CS as acceptable or grammatical vs unacceptable or ungrammatical A brand new model the Integrated Model of Plurilingual Code Switching IMPCS which recommends the use of five graded scales in informants judgments is proposed It includes socio psycholinguistics social status and prestige of the languages in contact official status of minority language symmetrical bi or pluridirectional or asymmetrical unidirectional kind of contact language mode claimed CS practice explicit attitudes and acceptability judgements and lexicalist variables **Code-switching in bilingual**

communication Anastasia Deibert, 2014-01-08 Thesis M A from the year 2010 in the subject English Language and Literature Studies Linguistics grade 1 University of Stuttgart Institut f r Linguistik course English Language and Literature Studies Linguistics language English abstract This thesis is about the use of two languages in everyday life Bilingualism is a facet of nearly every country in the world and code switching is a widespread characteristic of bilingual speech Today bilingualism and code switching research constitute a great area in linguistics An obvious and at the same time interesting aspect is that bilinguals will of course stay within one language when talking to monolinguals However when talking to other bilinguals they will probably use both languages Thus in bilingual conversations they often switch from one language to another and frequently even within an utterance The following example shows how a code switched sentence looks like 1 Es ist schon interessant dass wir so reden It s really interesting how we re talking like that I don t even notice that we re talking like that Such kinds of switches call for a special competence of the two languages involved But how well the bilinguals have to know each of the languages is a justifiable question These switches are not arbitrary since they may depend on the situation of the conversation the topic of the conversation the emotional aspects involved the language preference of the speaker and the need to express the own identity Bilingualism and especially code switching were long considered as a sign of linguistic decay Appel Muysken 1987 117 It was claimed that bilinguals are not able to acquire two languages properly and language mixing was often considered ungrammatical However both negative and positive views on the consequences of bilingualism have been studied and many studies showed positive evidence on bilingualism and code switching In recent years many researchers agreed that code switching even results from complex bilingual skills and is a natural communicative strategy *Code Switching*, 1982 Code-Switching in the Matrix Language-Frame Model Lena P., 2016-03-29 Bachelor Thesis from the year 2014 in the subject English Language and Literature Studies Linguistics grade 2 3 University of Cologne Englische Sprache und Literatur I language English abstract The purpose of this paper is to look at the relation

between structural and social factors in the formation of CS patterns in bi multilingual communities Furthermore the general applicability of the MLF and the MM to the CS data from different bilingual communities will be explored At the beginning the concept of code switching and its typology will be introduced In section 3 2 the MLF will be presented in order to define morphological and syntactical constraints for CS Then in the frame of the MM possible motivations for CS will be examined These are followed by the perspective on the relation of both models to each other In Chapter 4 using the MLF and the MM CS data from several bilingual communities will be analysed and finally problematic issues in both models will be discussed While monolinguals can vary their utterances by means of changing styles within a language or a dialect through speech rate or intonation bilinguals can do the same in both languages plus they can switch between the languages Thus the speech of bilingual speakers is interesting for research Many researchers have examined this language contact phenomenon and have tried to explain how and why people code switch The study of CS has developed in two main directions structural that is grammatical and sociolinguistic also called pragmatic aspect Originally CS was considered to be the result of poor language competence in both languages Later in the 1970s linguists for example Gumperz 1972 and Pfaff 1979 suggested that mixing between languages does not occur randomly but rather follows certain grammatical rules Many grammatical models have been proposed to account for the grammatical constraints in CS One of the most influential models the Matrix Language Frame Model MLF was introduced by Myers Scotton 1993b The model is based on two asymmetries matrix language vs embedded language and system vs content morphemes However not only structural factors but also social and psychological factors influence the speakers motivation to engage in CS It is one of the biggest challenges in the research on CS to link all these factors to provide a better understanding of the phenomenon of CS Therefore Myers Scotton 1993a went further and developed the Markedness Model MM in an attempt to explain why bilingual speakers code switch and how the social environment influences the type of CS present in the community

The Multilingual Internet Brenda Danet, Susan C. Herring, 2007 Devoted to analysing internet related CMC in languages other than English this volume collects 18 new articles on facets of language and internet use all of which revolve around several central topics writing systems the structure and features of local languages and how they affect internet use gender issues and so on

Code Choice in the Language Classroom Glenn S. Levine, 2011-01-25 Code Choice in the Language Classroom argues that the foreign language classroom is and should be regarded as a multilingual community of practice rather than as a perpetually deficient imitator of an exclusive second language environment From a sociocultural and ecological perspective Levine guides the reader through a theoretical empirical and pedagogical treatment of the important roles of the first language and of code switching practices in the language classroom Intended for SLA researchers language teachers language program directors and graduate students of foreign languages and literatures the book develops a framework for thinking about all aspects of code choice in the language classroom and offers concrete proposals for designing and carrying out instruction in a multilingual classroom

community of practice **The Sociolinguistic Dimension of Code Switching** Thuy Nguyen, 2009-03-27 Examination Thesis from the year 2008 in the subject English Language and Literature Studies Linguistics grade 1 3 University of Duisburg Essen language English abstract According to the World Atlas of Language Structure there are nearly seven thousand languages spoken throughout the world and more than half of the world's population is estimated to be bilingual and engages in code switching Due to such statistics it becomes obvious that nowadays the alternation between two languages is rather the norm than exception in many communities However the fact that bilingualism is so widespread is not the only reason why there has been and still is such an interest in this phenomenon as a research topic The question arises why the study of language behaviour over and over remains an interesting subject in linguistic research **Code Switching: A sociolinguistic perspective** Thuy Nguyen, 2014-04-01 Nowadays the alternation between two languages which is known as code switching is rather the norm than exception in many communities due to the fact that there are nearly seven thousand languages spoken throughout the world and more than half of the world's population is estimated to be bilingual and engages in code switching Code switching remains one of the central issues in bilingualism research For a long time code switching has been considered as a lack of linguistic competence since it was taken as evidence that bilinguals are not able to acquire two languages or keep them apart properly Nowadays it is the common belief that code switching is grammatically structured and systematic and therefore can no longer be regarded as deficient language behaviour The purpose of this essay is to explore the question why bilingual speakers engage in code switching based on selected theories from a sociolinguistic perspective which looks beyond the formal aspects and concentrates on the social pragmatic and cultural functions that code switching may have *Multidisciplinary Approaches to Code Switching* Ludmila Isurin, Donald Winford, Kees De Bot, 2009 The volume presents a selection of contributions by leading scholars in the field of code switching In the past the phenomenon of code switching was studied within different subfields of linguistics and they all took their own perspectives on code switching without taking into account findings from other subdisciplines This book raises a question of a much broader multidisciplinary approach to studying the phenomenon of code switching calls for integration of disciplines and illustrates how frameworks from one subfield can be applied to models in another The volume includes survey chapters empirical studies contributions that use empirical data to test new hypotheses about code switching or suggest new approaches and models for the study of code switching and chapters that discuss principles and constraints of code switching and code switching vs transfer The book is easily accessible to anyone who is interested in the phenomenon of code switching in bilinguals **OV and VO variation in code-switching** Shim Ji Young, 2021-03-11 This monograph is intended as a contribution to the field of bilingualism from a generative syntax perspective at a variety of levels It investigates code switching between Korean and English and also between Japanese and English which exhibit several interesting features Due to their canonical word order differences Korean and Japanese being SOV Subject Object Verb and English SVO Subject Verb

Object a code switched sentence between Korean Japanese and English can take in principle either OV or VO order to which little attention has been paid in the literature On the contrary word order is one of the most extensively discussed topics in generative syntax especially in the Principles and Parameters approach P Chomsky 1995 this monograph investigates word order variation in Korean English and Japanese English code switching with particular attention to the relative placement of the predicate verb and its complement object in two contrasting word orders OV and VO which was tested against Korean English and Japanese English bilingual speakers introspective judgments The results provide strong evidence indicating that the distinction between functional and lexical verbs plays a major role in deriving different word orders OV and VO respectively in Korean English and Japanese English code switching which supports the hypothesis that parametric variation is attributed to differences in the features of a functional category in the lexicon as assumed in minimalist syntax In particular the explanation pursued in this monograph is based on feature inheritance a syntactic derivational process which was proposed in recent developments the Minimalist Program The monograph shows that by studying diverse and creative word order patterns of code switching we are at a better disposal to understand how languages are parameterized similarly or differently in a given domain which is the very topic that generative linguists have pursued for a long time Functions of Code-Switching in Bilingual Conversations Heidi Veldtrup, 2013-03-18 Seminar paper from the year 2010 in the subject Didactics for the subject English Pedagogy Literature Studies grade 1 3 University of Hamburg Institut für Anglistik und Amerikanistik course Advanced Integrated Skills language English abstract Diese Hausarbeit analysiert beispielhaft eine Konversation von drei Menschen die sich bilingual unterhalten deutsch englisch Dabei wird näher auf die Funktionen eines Code switches d h der Wechsel der Sprachen innerhalb einer Konversation eingegangen Die Analyse erfolgte mithilfe einer transkribierten Tonaufnahme und eines Fragebogens This paper takes a closer look at the functions of code switching during a bilingual conversation with three participants This conversation was recorded transcribed and then used for this short analysis
