Logical Investigative Methods Robert J. Girod, 2014-09-25 This book describes how to use logic reasoning critical thinking and the scientific method to conduct and improve criminal and civil investigations The author discusses how investigators and attorneys can avoid assumptions and false premises and instead make valid deductions inductions and inferences He explains how tools such as interview and interrogation can be used to detect deception and profile unknown individuals and suspects The book is aimed at improving not only the conduct of investigations but also the logical use of cognitive analytical documentation and presentation tools to win cases **Spiritual Being & Becoming** Eric J. Kyle, 2015-03-06 It is reported that there are as many as 100 billion

neurons that make up the human nervous system This system is incredibly complex and yet it is a fundamental part of what makes us who we are Yet there is far more to human beings than biology Many academic disciplines study the human condition and there are many schools of thought within that study We must also appreciate that the study of human nature did not begin in contemporary times History particularly Western Christian history is full of texts that offer detailed explorations of the human condition However no consensus has yet emerged Consensus or not those working towards religious and spiritual formation are tasked with pursuing the transformation of their communities This book is an attempt to provide some of the background to support this ministerial work It seeks not only to offer a fuller understanding of some of the common views of human nature but also insights into how we might utilize this knowledge in our ministries ministries that strive towards the spiritual being and becoming of our world
