Macroeconomic News and Stock Returns in the United States and Germany Norbert Funke,Akimi Matsuda,2002-12
Using daily data for the January 1997 to June 2002 period we analyze the impact of a broad set of macroeconomic news on stock prices in the United States and Germany With GARCH specifications we test five hypotheses and find that news on real economic activity has a significant impact on stock prices The effects vary between different types of stocks and depend on the state of the economy In a boom period bad economic news may be good news for stock prices For German stock prices international news is at least as important as domestic news The analysis of bihourly data suggests that the main effect occurs within a short period of time **Review Of Financial Economics** R. DeYoung,2003 *The Impact of Macroeconomic Announcements on Real Time Foreign Exchange Rates in Emerging Markets* Fang Cai,2009 This paper utilizes a unique high frequency database to measure how exchange rates in nine emerging markets react to macroeconomic news in the U S and domestic economies from 2000 to 2006 We find that major U S macroeconomic news have a strong impact on the returns and volatilities of emerging market exchange rates but many domestic news do not Emerging market currencies have become more sensitive to U S news in recent years We also find that market sentiment could sway the impact of news on these currencies systematically as good bad news seems to matter more when optimism pessimism prevails Market uncertainty also interacts with macroeconomic news in a statistically significant way but its role varies across currencies and news Federal Reserve Board web site **Stock Market Liberalizations** Nicola Fuchs-Schündeln,Norbert Funke,2001 *Journal of Banking & Finance* ,1992 **Journal of the Institute of Public Enterprise** ,2017 *Index of Economic Articles in Journals and Collective Volumes* American Economic Association,1995
