Problems and Solutions on MRO Spare Parts and Storeroom Rolly Angeles, 2020-07-25 This book is written for industries in search of seeking solutions on their MRO Spare Parts and Storeroom problems MRO Spare Parts and Storeroom Management is one of the most most neglected maintenance strategies in any maintenance optimization and strategies which should not be the case Others say that this is the missing link to any reliability and maintenance improvement Almost every type of industry whether from manufacturing processing

pharmaceutical power plants mining construction aviation oil and gas have a storeroom in place to keep their spare parts There are two main goals of MRO Spare Parts and Storeroom which is quite conflicting This is to create a balance on minimizing the cost of spares inventory as well as providing all the parts and supplies needed to keep the plant operating It may sound conflicting or contradicting but thinking about this thoroughly it is really not conflicting if the MRO Storeroom is well managed The role of maintenance is to make the equipment available If the equipment fails and the part is not available in the storeroom the machine becomes idle and operation is halt On the contrary we just cannot simply stock every single part of every piece of equipment we have in the plant that is if your industry still wants to remain in business The items inside the storeroom can range from 1 000 for a small scale industry to more than 200 000 parts or even more for a large scale industry All industries have a place to store and keep spares for their equipment which is needed for repairs and Preventive Maintenance activities but not all industries have knowledge on how to manage their storeroom and spare parts In fact MRO storeroom and spare parts is one of the strategies where maintenance can truly save cost big time In other industries the problems on MRO Spare Parts are chronic and may have been existed for decades If industries are serious in improving their storeroom and finding the correct solutions on their MRO Spare Parts and Storeroom this book is a must read not only for storekeepers but also for maintenance purchasing finance and especially the c level people to find out what their missing Here are some of the highlights included in this book Provide a decision making process on whether to stock or not to stock parts through a MRO Decision Diagram or Algothim What can we do about squirrel stores and how to eliminate them permanently Learn the basic Golden Law on MRO Spare Parts Management Learn several options on what to do for obsolete parts inside the storeroom Learn one option on what to do with non moving parts Learn why not all critical parts need to be stock in the storeroom Learn several factors to consider before making a decision on whether to stock or not to stock parts in the storeroom Learn a much better way of determining the minimum quantity to be stored besides min max and EOQ calculation Provide the reader with a step by step roadmap on how to finally improve their MRO Storeroom Understand who are the best people or function to handle the maintenance storeroom and why Learn that one of the most important functions of the storekeeper is about maintaining and care for the spare parts Understand why improving the storeroom should be done inside and outside the storeroom And many more Majority of the problems on industries can be solved as mentioned in this book if industries are willing to make changes in how they do things in the plant Industries that achieve a level of World Class Maintenance were not born that way They were also reactive in the past but the leaders have a change of heart and propelled their workforce to a new direction so that they can stand off from the rest and compete globally in this fierce world of competition
