Governing Public Health Mark L Flear, 2015-07-30 This book contributes towards EU studies and the growing discourse on law and public health It uses the EU's governance of public health as a lens through which to explore questions of legal competence and its development through policy and concrete techniques processes and practices risk and security human rights and bioethics accountability and legitimacy democracy and citizenship and the nature essence and future trajectory of the European integration project These issues are explored first by situating the EU's public health strategy within the overarching architecture of governance and subsequently by examining its operationalisation in relation to the key public health problems of cancer HIV AIDS and pandemic planning The book argues that the centrality and valorisation of scientific and technical knowledge and expertise in the EU's risk based governance means that citizen participation in decision making is largely marginalised and underdeveloped and that this must change if

public health and the quality accountability and legitimacy of EU governance and its regulation are to be improved. Subsequently the book goes on to argue that the legitimating discourses of ethics and human rights and the developing notion of EU supra-stewardship responsibility can help to highlight the normative dimensions of governance and its interventions in public health. These discourses and dimensions provide openings and possibilities for citizens to power technologies of participation and contribute important supplementary knowledge to decision making.

Comparing Public Policies Jessica R. Adolino, Charles H. Blake, 2010-01-05. The study of comparative public policy reveals the intensely political nature of policy choices. While policy analysts often look to policy successes and failures outside their borders to draw valuable lessons and insights, cultural, economic, political, and institutional conditions vary from country to country and strongly affect how policy analysis is ultimately used. By combining a conceptual discussion of policy making with an examination of seven specific policy areas, Jessica Adolino and Charles Blake show how politics in the realm of the environment, education, taxation, economics, immigration, health care, and social welfare shapes policy choices. The second edition of *Comparing Public Policies* has been revised and updated to reflect the most recent political and policy developments. This new edition expands coverage of the internationalization of domestic policy making by including a European Union case study in each issue area along with further discussion of the role of international interest groups in the policy process. The seven policy chapters have been revised and updated to examine current issues in the United States, Japan, Germany, France, the United Kingdom, Italy, and the European Union, such as the heightened calls for immigration policy reform, the return to higher budget deficits in several countries, the efforts to lower tax rates in countries with falling expenditures, and in countries with rising spending levels, the often unsuccessful attempts to control increasing health care costs in countries with aging populations, the spirited debate over the future role of the welfare state in an increasingly globalized economy, the at times divergent education reform debates regarding the role of assessment and calls for decentralization, the uneven environmental performance in the reduction of carbon dioxide emissions. Chapters include analyses of cross-national trends, past and present, and a final chapter reexamines the internationalization of public policy in industrialized countries. Useful pedagogical features have been incorporated throughout the text, including In-Depth boxes that offer detailed discussion of the political process or analytical techniques, and Country At a Glance boxes that provide quick reference to political institutions. A wealth of recent data is displayed in numerous tables, and a glossary gives students a practical guide to terminology.
