The Real Jaws Rachel Lee Perez, 2025-08-30 Explores the 1916 New Jersey shark attacks their impact on shark fear and how media shaped harmful misconceptions In the Summer of 1916 a series of shark attacks along the New Jersey shore would send shockwaves across its otherwise peaceful beach towns Spanning a terrifying two weeks including the deaths of nearly five people these attacks would officially cement an innate fear of sharks that humans have felt since the beginning of time Although initially kept under wraps by the tourism industry these attacks would ultimately plaster the front pages of newspapers across the United States and even overseas As the news spread the line between fact and fiction blurred reshaping our cultural and scientific understanding of the beasts of the ocean It was the 1916 shark attacks that would establish our modern day misconstrued perception of sharks as evil man eating monsters and would later inspire the film Jaws which would perpetuate the same harmful narrative The Real Jaws takes an in depth look at each one of the attacks and how they instilled a centuries long fear of the ocean's apex predator It explores the various theories explaining why these attacks may have occurred and the probability of something like this happening again And finally it analyses the way the harmful misconceptions derived from films like Jaws have redefined humanity's relationship with sharks leading humans to become the predators and sharks to become the prey

Kenneth Swope, 2018-07-01 The Manchu Qing victory over the Chinese Ming Dynasty in the mid seventeenth century was one of the most surprising and traumatic developments in China's long history In the last year of the Ming the southwest region of China became the base of operations for the notorious leader Zhang Xianzhong 1605-47 a peasant rebel known as the Yellow Tiger Zhang's systematic reign of terror allegedly resulted in the deaths of at least one sixth of the population of the entire Sichuan province in just two years The rich surviving source record however indicates that much of the destruction took place well after Zhang's death in 1647 and can be attributed to independent warlords marauding bandits the various Ming and Qing armies vying for control of the empire and natural disasters *On the Trail of the Yellow Tiger* is the first Western study to examine in detail the aftermath of the Qing conquest by focusing on the social and demographic effects of the Ming Qing transition By integrating the modern techniques of trauma and memory studies into the military and social history of the transition Kenneth M Swope adds a crucial piece to the broader puzzle of dynastic collapse and reconstruction He also considers the Ming Qing transition in light of contemporary conflicts around the globe offering a comparative military history that engages with the universal connections between war and society **Nature Conservation in**

Southern Africa, 2018-11-26 Nature conservation in southern Africa has always been characterised by an interplay between Capital specific understandings of Morality and forms of Militarism that are all dependent upon the shared subservience and marginalization of animals and certain groups of people in society Although the subjectivity of people has been rendered visible in earlier publications on histories of conservation in southern Africa the subjectivity of animals is hardly ever seriously considered or explicitly dealt with In this edited volume the subjectivity and sentience of animals is explicitly included The contributors argue that the shared human and animal marginalisation and agency in nature conservation in southern Africa and beyond could and should be further explored under the label of sentient conservation Contributors are Malcolm Draper Vupenyu Dzingirai Jan Bart Gewald Michael Glover Paul Hebinck Tariro Kamuti Lindiwe Mangwanya Albert Manhamo Dhoya Snijders Marja Spierenburg Sandra Swart Harry Wels **The Royal Hunt in Eurasian History** Thomas

T. Allsen, 2011-06-03 From antiquity to the nineteenth century the royal hunt was a vital component of the political cultures of the Middle East India Central Asia and China Besides marking elite status royal hunts functioned as inspection tours and imperial progresses a means of asserting kingly authority over the countryside The hunt was in fact the court out of doors an open air theater for displays of majesty the entertainment of guests and the bestowal of favor on subjects In the conduct of interstate relations great hunts were used to train armies show the flag and send diplomatic signals Wars sometimes began as hunts and ended as celebratory chases Often understood as a kind of covert military training the royal hunt was subject to the same strict discipline as that applied in war and was also a source of innovation in military organization and tactics Just as human subjects were to recognize royal power so was the natural kingdom brought within the power structure by means of the royal hunt Hunting parks were centers of botanical exchange military depots early conservation reserves and important links in local ecologies The mastery of the king over nature served an important purpose in official renderings as a manifestation of his possession of heavenly good fortune he could tame the natural world and keep his kingdom safe from marauding threats human or animal The exchanges of hunting partners cheetahs elephants and even birds became diplomatic tools as well as serving to create an elite hunting culture that transcended political allegiances and ecological frontiers This sweeping comparative work ranges from ancient Egypt to India under the Raj With a magisterial command of contemporary sources literature material culture and archaeology Thomas T Allsen chronicles the vast range of traditions surrounding this fabled royal occupation
