Rethinking Western Approaches to Counterinsurgency Russell W. Glenn, 2015-05-22 This book critically examines the Western approach to counter insurgency in the post colonial era and offers a series of recommendations to address current shortfalls The author argues that current approaches to countering insurgency rely too heavily on conflicts from the post World War II years of waning colonialism Campaigns conducted over half a century ago Malaya Aden and Kenya among them remain primary sources on which the United States British Australian and other militaries build their guidance for dealing with insurgent threats this though both the character of those threats and the conflict environment are significantly different than was the case in those earlier years This book addresses the resulting inconsistencies by offering insights analysis and recommendations drawn from campaigns more applicable to counter insurgency today Eight post colonial conflicts to include Northern Ireland Sierra Leone Colombia and Iraq provide the basis for analysis All are examples in which counterinsurgents attained or continue to demonstrate considerable progress when taking on enterprises better known for disaster and disappointment Recommendations resulting from these analyses challenge entrenched beliefs to serve as the impetus for essential change Rethinking Western Approaches to Counterinsurgency will be of much interest to students of counter insurgencies military and strategic studies security studies and IR in general

their current perspectives *Routledge Handbook of Risk Studies* Adam Burgess,Alberto Alemanno,Jens Zinn,2016-03-31 It is over 40 years since we began to reflect upon risk in a more social than technological and economic fashion firstly making sense of the gap between expert and public assessment of risks such as to our health and environment With fixed certainties of the past eroded and the technological leaps of big data ours is truly an age of risk uncertainty and probability from Google s algorithms to the daily management of personal lifestyle risks Academic reflection and research has kept pace with these dizzying developments but remains an intellectually fragmented field shaped by professional imperatives and disciplinary boundaries from risk analysis to regulation and social research This is the first attempt to draw together and define risk studies through a definitive collection written by the leading scholars in the field It will be an indispensable resource for the many scholars students and professionals engaging with risk but lacking a resource to draw it all together *Urban Transport in the Developing World* Harry T. Dimitriou,Ralph Gakenheimer,2011-01-01 Policy making for urban transport and planning of economies in the developing world present major challenges for countries facing rapid urbanisation and rampant motorisation alongside growing commitments to sustainability These challenges include coping with financial deficits providing for the poor dealing meaningfully with global warming and energy shortages addressing traffic congestion and related land use issues adopting green technologies and adjusting equitably to the impacts of globalisation This book presents a contemporary analysis of these challenges and new workable responses to the urban transport problems they spawn **The Mind and Method of the Economist** Brian J.
