

Why Diamond Vision Is Scaring The Daylights Out Of The Television Industry.

People buying televisions aren't the only ones looking intently at Mitsubishi these days.

So are the people making televisions. What they're seeing is what their would-be customers are seeing: a television picture that is significantly more vivid, more detailed, more dimensional than their own.

What's more, these manufacturers are

well aware that to keep pace they must develop the technology that does what only Diamond Vision® does.

UP TO 40% WIDER COLOR RANGE WITH DIAMOND VISION.

Daylight or roomlight that's reflected into your screen destroys the color and robs the

contrast from a television picture—anyone's television picture.

A combination of chemicals mixed into a Diamond Vision screen absorbs most of the ambient light striking the facsimile. While at the same time, the screen selectively filters out the impure light emitted by the phosphors. And the phosphors themselves have been "re-engineered" to match the screen's new transmission characteristics.

This process has a number of desirable effects on the quality of the image reaching you in your living room.

The colors are deeper, purer, astonishingly rich with dramatically improved contrast, all relatively unaffected by the amount of ambient light present while you're viewing.

And, since the color is more accurately reproduced, subtle shades and hues are revealed. Sky blue, sea green, crimson rose. Colors not seen on any other set. With a three-dimensional quality that makes others look flat, homogenized in comparison.

Frankly, it would be overly conservative to call Diamond Vision anything less than one of the two most important innovations ever in the color television tube.

This year, Diamond Vision is featured

on a full range of Mitsubishi color TVs, from our 13-inch portables to our 25-inch consoles. Most of these models, typified by the distinctive CS-186CR Monitor/Receiver, shown here, also include a host of technological refinements and creature comforts making them as beautiful to live with as they are to watch.

picture's excellence under real-world conditions. Direct video/audio inputs. Variable audio output. A/B antenna switching. And the convenience of controlling most of these features and functions from an ultra-thin wireless remote control.

You can verify all this with a visit to your Mitsubishi dealer.

For only in side-by-side comparison can you appreciate the dramatic difference Diamond Vision makes.

Originally developed by building 40-by-60 foot television for sports stadiums. Now dramatically reduced for the home.
