Longman Advanced Learners' Grammar Mark Foley, Diane Hall, 2003 *ELT Revisited* Marcela Malá, Zuzana Šaffková, 2016-08-17 This volume brings together selected papers presented during the 9th International Conference of the Association of Czech Teachers of English titled Teaching for Tomorrow and hosted by the English Department of the Faculty of Science Humanities and Education at the Technical University of Liberec, Czech Republic. The conference brought together English Language Teaching (ELT) professionals from primary, secondary and tertiary education to discuss a variety of English as a Foreign Language (EFL) related topics ranging from reports on language research to viewpoints and insights on classroom practice. The contributions are grouped into three sections: a) Focus on Selected Language Topics, b) Increasing Learner Autonomy and c) Innovative Teaching English as a Foreign Language (TEFL) ideas. Papers were carefully chosen in order to appeal to a broad audience. Consequently, there are articles which have a mainly theoretical bent and those which have a more practical leaning. Although the conference was hosted in the Czech Republic and the majority of participants were from this country, the book is relevant to any context where English is taught as a foreign or second language. Therefore, teachers, advanced students of English, language researchers and indeed anyone engaged in the EFL profession will find this collection both educational and thought provoking.

Spanish Learner Corpus Research Margarita Alonso-Ramos, 2016-12-16 The aim of this book is to present a comprehensive picture of the current state of Spanish learner corpus research (SLCR) which makes it unique since no other monograph has focused on collecting research dealing with learner corpora of any language other than English. In addition to an introductory appraisal of current SLCR as well as a wake up call reminding us that learner corpus design still needs to be improved, this volume features a selection of original studies ranging from general issues concerning learner corpora compilation to more specific aspects such as phonetic, lexical, grammatical and pragmatic features of the interlanguage of learners of Spanish as reflected in corpus data. This volume will undoubtedly be of significant interest to researchers involved in corpus linguistics, second language acquisition research as well as to professionals in the field of Spanish as a second language including teachers and creators and publishers of teaching materials.

Developmental and Crosslinguistic Perspectives in Learner Corpus Research Yukio Tono, Yuji Kawaguchi, Makoto Minegishi, 2012-03-28 This volume provides a state of the art overview of current research and developments on the use of learner corpora perceived from developmental and crosslinguistic perspectives. The book is divided into two parts. The eleven contributions of Part I investigate the development of English language skills of young learners across seven countries/regions on the basis of a new corpus resource called the International Corpus of Crosslinguistic Interlanguage (ICCI). Part II contains seven papers devoted to other

varieties of learner corpora especially spoken learner corpora and learner corpora of languages other than English

Sina Bröcker, 2007-04-16 Seminar paper from the year 2003 in the subject English Language and Literature Studies Linguistics grade 2 University of Rostock Institut f r Sprachwissenschaft course Hauptseminar Corpus dictionaries and lexical structure language English abstract The first dictionary was published in 1984 At that time the focus lay on lexicography especially on English as an international language Nowadays nearly every three month new dictionaries appear They are mainly published from publishing houses in Great Britain This is due to the dominance which British lexicography won in the 1960s When the first Longman Dictionary of Contemporary English appeared in 1978 British lexicography had finally won dominance to American lexicography In 1987 the second edition of the Longman Dictionary of Contemporary English and the Collins COBUILD Dictionary of the English language appeared These works were completely different to the ones before According to Sidney I Landau these works were in many respects a daring departure from the customary practices of lexicography and particularly of ESL lexicography They offered a new look at what the user needed The aim of this paper is to take a closer look on these dictionaries to check whether they are working with authentic language material to explain words and how easy or difficult it is for a user to understand the explained issues In grammars the different features of a language are

considered systematically Spoken and written language material is described Nowadays the grammarians are working together with Universities or at least base their entries on large databases that include millions of texts taken out of various forms of writing and communication situations This system is meant to help to provide the use of authentic language material that is familiar to the grammar user In the analysed grammars invented examples are avoided with the aim to offer the user a better access to the explained issue The aim of this paper is to analyse the used example solutions by keeping an eye on whether they are really authentic and easy to understand or not better than the invented ones that were often used in former times *Advanced Grammar in Use.
