Goodman,2021-12-07 Winner 2024 W W Howells Prize American Anthropological Association Biological Anthropology Section The science on race is clear Common categories like Black white and Asian do not represent genetic differences among groups But if race is a pernicious fiction according to natural science it is all too significant in the day to day lives of racialized people across the globe Inequities in health wealth and an array of other life outcomes cannot be explained without referring to race but their true source is racism What do we need to know about the pseudoscience of race in order to fight racism and fulfill human potential In this book two distinguished scientists tackle common misconceptions about race human biology and racism Using an accessible question and answer format Joseph L Graves Jr and Alan H Goodman explain the differences between social and biological notions of race Although there are many meaningful human genetic variations they do not map onto socially constructed racial categories Drawing on evidence from both natural and social science Graves and Goodman dismantle the malignant myth of gene based racial difference They demonstrate that the ideology of racism created races and show why the inequalities ascribed to race are in fact caused by racism Graves and Goodman provide persuasive and timely
