The Macroeconomics of Imperfect Competition and Nonclearing Markets Jean-Pascal Benassy, 2005-01-14 In this book Jean Pascal Benassy attempts to integrate into a single unified framework dynamic macroeconomic models reflecting such diverse lines of thought as general equilibrium theory imperfect competition Keynesian theory and rational expectations He begins with a simple microeconomic synthesis of imperfect competition and nonclearing markets in general equilibrium under rational expectations He then applies this framework to a large number of dynamic macroeconomic models covering such topics as persistent unemployment endogenous growth and optimal fiscal monetary policies The macroeconomic methodology he uses is similar in spirit to that of the popular real business cycles theory but the scope is much wider All of the models are solved by hand making the underlying economic mechanisms particularly clear

Akerlof, Olivier Blanchard, David Romer, Joseph E. Stiglitz, 2016-09-02 Top economists consider how to conduct policy in a world where previous beliefs have been shattered by the recent financial and economic crises Since 2008 economic policymakers and researchers have occupied a brave new economic world Previous consensus have been upended former assumptions have been cast into doubt and new approaches have yet to stand the test of time Policymakers have been forced to improvise and researchers to rethink basic theory George Akerlof Nobel Laureate and one of this volume's editors compares the crisis to a cat stuck in a tree afraid to move In April 2013 the International Monetary Fund brought together leading economists and economic policymakers to discuss the slowly emerging contours of the macroeconomic future This book offers their combined insights The editors and contributors who include the Nobel Laureate and bestselling author Joseph Stiglitz Federal Reserve Vice Chair Janet Yellen and the former Governor of the Bank of Israel Stanley Fischer consider the lessons learned from the crisis and its aftermath They discuss among other things post crisis questions about the traditional policy focus on inflation macroprudential tools which focus on the stability of the entire financial system rather than of individual firms and their effectiveness fiscal stimulus public debt and fiscal consolidation and exchange rate arrangements **Free to Fail** Arjen van Witteloostuijn, Hugh C. van der Mandele, 2013-01-01 This challenging book tackles one of the most fundamental questions in economics Why are commercial organizations more efficient than organizations in the public domain It is generally accepted that the traditional answer the fact that commercial organizations maximize profits does not necessarily hold true Finding a solution to this anomaly as this book attempts to do should therefore be a prime concern in economics The authors believe the answer lies in the fact that even in a completely stable environment all organizations will eventually fail irreparably Organizations operating in the market are more efficient because once in decline they are free to fail and allowed to be disassembled or even replaced Public organizations that fail are more often than not protected and allowed to continue even though their efficiency is questionable This fascinating and thought provoking book will provide a stimulating read for academics and students with an interest in economics business and management and public policy **Progress and Confusion** Olivier
