Man Walks Into A Room Nicole Krauss:

Man Walks Into a Room Nicole Krauss, 2003-11-11 A luminous and unforgettable first novel by an astonishing new voice in fiction hailed by Esquire magazine as one of America's best young writers Samson Greene a young and popular professor at Columbia is found wandering in the Nevada desert When his wife Anna comes to bring him home she finds a man who remembers nothing not even his own name The removal of a small brain tumor saves his life but his memories beyond the age of twelve are permanently lost Here is the story of a keenly intelligent sensitive man returned to a life in which everything is strange and new An emigrant from his own life set free from all that once defined him Samson Greene believes he has nothing left to lose So when a charismatic scientist asks him to participate in a bold experiment he agrees Launched into a turbulent journey that takes him to the furthest extremes of solitude and intimacy what he gains is nothing short of the revelation of what it means to be human *Diseases and Disorders in Contemporary Fiction* James Peacock, Tim

Lustig, 2013-04-17 The essays in this collection address the current preoccupation with neurological conditions and disorders in contemporary literature by British and American writers The book places these fictional treatments within a broader cultural and historical context exploring such topics as the two cultures debate the neurological turn postmodernism and the post postmodern and responses to September 11th Considering a variety of materials including mainstream literary fiction the graphic novel popular fiction autobiographical writing film and television contributors consider the contemporary dimensions of the interface between the sciences and humanities developing the debate about the post postmodern as a new humanism or a return to realism and investigating questions of form and genre and of literary continuities and discontinuities Further the essays discuss contemporary writers attempts to engage the relation between the individual and the social looking at the relation between the syndrome syndrome referring to the prevalence in contemporary literature of neurological phenomena evident at the biological level and existing work in the field of trauma studies where explanations tend to have taken a psychoanalytical form allowing for perspectives that question some of the assumptions that have marked both these fields The current literary preoccupation with neurological conditions presents us with a new and distinctive form of trauma literature one concerned less with psychoanalysis than with the physical and evolutionary status of human beings

Facing Trauma in Contemporary American Literary Discourse Laura Virginia Castor, 2019-10-08 Trauma has always been part of the American collective experience but only since September 11 2001 has it been acknowledged on a widespread scale Most people will experience some form of trauma during their lifetime but in contemporary American culture it is often understood as a problem to be blamed on someone fought or repressed entirely Despite burgeoning trauma studies popular responses to trauma from the media to politics produce ever more aggression and fear This book responds to this growing awareness through literary analyses of texts by Louise Erdrich Siri Hustvedt Melanie Thernstrom Nicole Krauss Joy Harjo Linda Hogan Jhumpa Lahiri and Toni Morrison Considered separately each chapter provides a lens into a

historically situated trauma and the process of renegotiating it Read together they function as voices in an ongoing conversation that affirms the power of narrative A good story can become a space for curiosity in the face of trauma and uncertainty A story opens imaginative possibilities for asking in what ways can readers bring more awareness to the benefits of seeing our planetary interdependence in the midst of global polarization The readings of novels autobiographical texts and poems here suggest how this question is among the most valuable we can ask in the early 21st century **The**

The Access to Subjectivity Cesar Ojeda, 2023-04-14 This book explores the conceptual and practical connections that exist between phenomenology, Buddhism, and psychotherapy. These three disciplines clearly have completely different origins, histories, conceptualizations, and academic environments, and at first blush, there seems to be no real bond between them. However, this book shows that there are connections between these diverse approaches, but they have the peculiar character of being latent and hidden. Thus, phenomenology and the practice of mindfulness share a similar, though perhaps not explicit, goal to exclude the ego. Notwithstanding this connection, they approach this task from quite separate roads, each of which conceals this implicit goal, giving the impression that both disciplines are irreducible and disconnected, as if they were completely distinct and closed systems. Mathematical Models in the Biosciences I Michael Frame, 2021-06-22 An award-winning professor's introduction to essential concepts of calculus and mathematical modeling for students in the biosciences. This is the first of a two-part series exploring essential concepts of calculus in the context of biological systems. Michael Frame covers essential ideas and theories of basic calculus and probability while providing examples of how they apply to subjects like chemotherapy and tumor growth, chemical diffusion, allometric scaling, predator-prey relations, and nerve impulses. Based on the author's calculus class at Yale University, the book makes concepts of calculus more relatable for science majors and premedical students. *Misfit Forms* Lorri G. Nandrea, 2015-01-02 The complicated junctions negotiated by the novel during the eighteenth century reveal not only achievements but also exclusions. *Misfit Forms* offers a speculative reconstruction of roads less traveled. What if typographical emphasis and its associated transmission of sensuality and feeling had not lost out to transparent typography and its paradigms of sympathetic identification? What was truncated when cumulative narrative structures were declared primitive in relation to the unified teleological plot? What visions of the novel's value as an arena for experience were sidelined when novel reading was linked to epistemological gain? Reading novels by Sterne, Charlotte Brontë, Defoe, Gaskell, Hardy, and Woolf in tandem with less-known works, Nandrea illuminates the modes and techniques that did not become mainstream. Following Deleuze, Nandrea traces the dynamic repetitions of these junctures in the work of later writers. Far from showing the eclipse of primitive modes, such moments of convergence allow us to imagine other possibilities for the novel's trajectory. New Critical Essays on Kurt Vonnegut D. Simmons, 2015-12-04 Kurt Vonnegut's darkly comic work became a symbol for the counterculture of a generation. From his debut novel *Player Piano* (1951) through seminal 1960s novels such as *Cat's Cradle* (1963) and *Slaughterhouse-Five* (1969) up to the recent success of *A Man Without a Country* (2005), Vonnegut's writing has remained commercially popular, offering a satirical yet optimistic outlook on modern life. Though many fellow writers admired Vonnegut, Gore Vidal famously suggested that Kurt was never dull; the academic establishment has tended to retain a degree of

scepticism concerning the validity of his work This dynamic collection aims to re evaluate Vonnegut s position as an integral part of the American post war cannon of literature

Belonging and Narrative Laura Bieger,2018-11-09 Why did the novel become so popular in the past three centuries and how did the American novel contribute to this trend As a key provider of the narrative frames and formulas needed by modern individuals to give meaning and mooring to their lives Drawing on phenomenological hermeneutics human geography and social psychology Laura Bieger contends that belonging

is not a given it is continuously produced by narrative Against the current emphasis on metaphors of movement and destabilization she explores the salience and significance of home Challenging views of narrative as a mechanism of ideology she approaches narrative as a practical component of dwelling in the world and the novel a primary place making agent

Postmodern/Postwar and After Jason Gladstone, Andrew Hoberek, Daniel Worden, 2016-07-01 Within the past ten years the field of contemporary American literary studies has changed significantly Following the turn of the twenty first century and mounting doubts about the continued explanatory power of the category of postmodernism new organizations have emerged book series have been launched journals have been created and new methodologies periodizations and thematics have redefined the field *Postmodern Postwar and After* aims to be a field defining book a sourcebook for the new and emerging critical terrain that explores the postmodern postwar period and what comes after The first section of essays returns to the category of the post modern and argues for the usefulness of key concepts and themes from postmodernism to the study of contemporary literature or reevaluates postmodernism in light of

recent developments in the field and historical and economic changes in the late twentieth and early twenty first centuries These essays take the contemporary abandonments of postmodernism as an occasion to assess the current states of postmodernity After that the essays move to address the critical shift away from postmodernism as a description of the present and toward a new sense of postmodernism as just one category among many that scholars can use to describe the recent past The final section looks forward and explores the question of what comes after the postwar postmodern Taken together these essays from leading and emerging scholars on the state of twenty first century literary studies provide a number of frameworks for approaching contemporary literature as influenced by yet distinct from postmodernism The result is an indispensable guide that seeks to represent and understand the major overhauling of postwar American literary studies that is currently underway
