,2001 Designing Cost Management Systems to Support Business Decision-Making Pieter Buys,2021-07-19 This
book illustrates the importance effective cost management systems in providing a supportive environment in which reliable
and relevant management information can be generated Such a cost management system is only attainable if the importance
of key business operational and stakeholder requirements are recognised within the organisational context In illustrating this
importance this book provides several case studies as examples thereof The first two case studies focus on the engineering
sector and illustrates the development of a cost management system in a water recycling context and the design of a
budgetary system in a mining engineering context The remaining case studies focus on the services sector including cost
management systems for a digital technology services provider and a medical insurance services provider an alternative
activity based costing approach for a public sector services provider and finally a re designed value stream for an automotive
services provider Academic researchers and industry managers in the fields of management accounting and financial
management as well as engineering and operations management will find value in the experiences described herein
