Managing A Consumer Lending Business 2nd Edition:

Managing a Consumer Lending Business David Lawrence, Arlene Solomon, 2013-03-08 Managing a Consumer Lending Business 2nd edition summarizes the lore and knowledge of the business in the early 21st century. It covers many subjects a good manager should know: the importance of how to attract enough good accounts to offset the inevitable bad accounts that every lender will get; controlling line sizes; encouraging use by good customers; controlling the use by bad customers; managing profitability with predictability if he or she is to effectively run a high volume consumer business. The second edition covers some of the problems the financial services industry experienced in the early 2000s and some of the resulting regulations implemented. The updated MIS demonstrates and compares this later period to earlier results for the industry.

Managing a Consumer Lending Business David B. Lawrence, Arlene Solomon, 2002-07-01 Manuale del credito al consumo - II edizione Umberto Filotto, Stefano Cosma, 2011-11-24 T00:00:00+01:00 Il volume inquadra le ragioni dello sviluppo del credito al consumo e sviluppa una riflessione sulla sua funzione: analizza i mercati e la domanda, l'offerta e gli assetti competitivi. I profili regolamentari sono trattati sia con riferimento al ruolo delle Autorità di controllo sia con un approfondito esame delle diverse normative che disciplinano il settore e l'attività. Terminato l'esame dei profili macro e istituzionali, si approfondiscono gli aspetti di gestione: i prodotti, i canali distributivi e il marketing, i processi e la valutazione del merito di credito, il risk management, la gestione dei rischi operativi e la prevenzione delle frodi, la gestione finanziaria. Alla conclusione si trattano le tematiche connesse al consumerismo e ai nuovi rapporti tra imprese e consumatori. Così come i temi sono articolati, così sono variegate le competenze e la matrice degli autori: accademici e ricercatori, ma anche manager, consulenti e professionisti. Questa varietà di esperienze fa sì che i contenuti del volume siano a un tempo approfonditi, rigorosi e spiccatamente operativi. Paying with Plastic, second edition David S. Evans, Richard Schmalensee, 2004-12-17 The definitive account of the trillion dollar payment card industry. The payment card business has evolved from its inception in the 1950s as a way to handle payment for expense account lunches, the Diners Club card, into today's complex sprawling industry that drives trillions of dollars in transaction volume each year. Paying with Plastic is the definitive source on an industry that has revolutionized the way we borrow and spend. More than a history book, Paying with Plastic delivers an entertaining discussion of the impact of an industry that epitomizes the notion of two-sided markets: those in which two or more customer groups receive value only if all sides are actively engaged. New to this second edition, the two-sided market discussion provides useful insight into the implications of these market dynamics for cardholder rewards, merchant interchange fees, and card acceptance. The authors, both of whom have researched the industry for more than 25 years, also examine the implications of the recent antitrust cases on the industry as well as other business and technological changes, including the massive consolidation brought about by bank mergers, the rise of the debit card, and the emergence of e-commerce that could alter the payment card industry dramatically in the years to come. **Managing Credit Risk** John B.

Elliehausen, 2014 Consumer Credit and the American Economy examines the economics, behavioral science, sociology, history, institutions, law, and regulation of consumer credit in the United States. After discussing the origins and various kinds of consumer credit available in today's marketplace, this book reviews at some length the long-run growth of consumer credit to explore the widely held belief that somehow consumer credit has risen too fast for too long. It then turns to demand and supply, with chapters discussing neoclassical theories of demand, new behavioral economics, and evidence on production costs and why consumer credit might seem expensive compared to some other kinds of credit, like government finance. This discussion includes a review of the economics of risk management and funding sources, as well as a discussion of the economic theory of why some people might be limited in their

credit search the phenomenon of credit rationing This examination includes review of issues of risk management through mathematical methods of borrower screening known as credit scoring and financial market sources of funding for offerings of consumer credit The book then discusses technological change in credit granting It examines how modern automated information systems called credit reporting agencies or more popularly credit bureaus reduce the costs of information acquisition and permit greater credit availability at less cost This discussion is followed by examination of the logical offspring of technology the ubiquitous credit card that permits consumers access to both payments and credit services worldwide virtually instantly After a chapter on institutions that have arisen to supply credit to individuals for whom mainstream credit is often unavailable including payday loans and other small dollar sources of loans discussion turns to legal structure and the regulation of consumer credit There are separate chapters on the theories behind the two main thrusts of federal regulation to this point fairness for all and financial disclosure Following these chapters there is another on state regulation that has long focused on marketplace access and pricing Before a final concluding chapter another chapter focuses on two noncredit marketplace products that are closely related to credit The first of them debt protection including credit insurance and other forms of credit protection is economically a complement The second product consumer leasing is a substitute for credit use in many situations especially involving acquisition of automobiles This chapter is followed by a full review of consumer bankruptcy what happens in the worst of cases when consumers find themselves unable to repay their loans Because of the importance of consumer credit in consumers financial affairs the intended audience includes anyone interested in these issues not only specialists who spend much of their time focused on them For this reason the authors have carefully avoided academic jargon and the mathematics that is the modern language of economics It also examines the psychological sociological historical and especially legal traditions that go into fully understanding what has led to the demand for consumer credit and to what the markets and institutions that provide these products have become today
