Future Work A. Maitland,P. Thomson,2011-10-07 The way we work is changing in the Internet age The new majority of the workforce women Generation Y the over 50s as well as growing numbers of men share a need for greater control and choice about where how and when they work This is a guide to the skills you will need and the challenges you will face in the 21st century world of work

The Future of the Professions Richard Susskind,Daniel Susskind,2022-03-31 This book predicts the decline of today s professions and introduces the people and systems that will replace them In an internet enhanced society according to Richard Susskind and Daniel Susskind we will neither need nor want doctors teachers accountants architects the clergy consultants lawyers and many others to work as they did in the 20th century The Future of the Professions explains how increasingly capable technologies from telepresence to artificial intelligence will place the practical expertise of the finest specialists at the fingertips of everyone often at no or low cost and without face to face interaction The authors challenge the grand bargain the arrangement that grants various monopolies to today s professionals They argue that our current professions are antiquated opaque and no longer affordable and that the expertise of their best is enjoyed only by a few In their place they propose five new models for producing and distributing expertise in society The book raises profound policy issues not least about employment they envisage a new generation of open collared workers and about control over online expertise they warn of new gatekeepers in an era when machines become more capable than human beings at most tasks With a new preface exploring recent critical developments this updated edition builds on the authors groundbreaking research into more than a dozen professions Illustrated with numerous examples from each this is the first book to assess and question the relevance of the professions in the 21st century

Future Work (Expanded and Updated) A. Maitland,P. Thomson,2014-03-20 The way we work is overdue for change This newly updated guide to the challenges you will face in the 21st century world of work sets out a compelling case for change in organizational cultures and working practices to boost output cut costs give employees more freedom over how they work and contribute to a greener economy
