The Dominant Animal Human Evolution And Environment Paul R Ehrlich:

The Dominant Animal Paul R. Ehrlich, Anne H. Ehrlich, 2008-06-30 Humans are unquestionably the dominant animal. Why then are we creating a world that threatens our own species? Two renowned scientists tackle the fundamental challenge of the human predicament and offer a vivid and unique exploration of humanity's origins, evolution, and its potential future.

Occupy the Future David Grusky, Doug McAdam, Rob Reich, Debra Satz, 2013-01-18 How the Occupy movement has challenged the gap between American principles and American practice and how we can realize our most cherished ideals. The Occupy Wall Street movement has ignited new questions about the relationship between democracy and equality in the United States. Are we also entering a moment in history in which the disjuncture between our principles and our institutions is cast into especially sharp relief? Do new developments, most notably the rise of extreme inequality, offer new threats to the realization of our most cherished principles? Can we build an open, democratic, and successful movement to realize our ideals? *Occupy the Future* offers informed and opinionated essays that address these questions. The writers, including Nobel Laureate in Economics Kenneth Arrow and bestselling authors Paul and Anne Ehrlich, lay out what our country's principles are, whether we're living up to them, and what can be done to bring our institutions into better alignment with them. Contributors: David Grusky, Doug McAdam, Rob Reich, Erin Cumberworth, Debra Satz, Kenneth J. Arrow, Kim A. Weeden, Sean F. Reardon, Prudence L. Carter, Shelley J. Correll, Gary Segura, David D. Laitin, Cristobal Young, Charles Varner, Doug McAdam, Paul R. Ehrlich, Anne H. Ehrlich, Paul R. Ehrlich, and Anne H. Ehrlich, Donald A. Barr, Michele Elam, Jennifer Devere, Brody H. Samy, Alim and David Palumbo Liu.

The Nature Study Movement Kevin C. Armitage, 2009 The first comprehensive history of the nature study movement and its significance to American environmental thought and politics. Argues that nature study advocates, through their systematic program of educating children about nature, formed a critical foundation for the launching of the conservation movement.

Life Paul R. Ehrlich, 2023-01-17 A renowned scientist and environmental advocate looks back on a life that has straddled the worlds of science and politics. Entirely entertaining. Kirkus Reviews. Acclaimed as a public scientist and as a spokesperson on pressing environmental and equity issues, delivering his message from the classroom to 60 Minutes, Paul R. Ehrlich reflects on his life, including his love affair with his wife Anne, his scientific research, his public advocacy, and his concern for global issues. Interweaving the range of his experiences as an airplane pilot, a desegregationist, a proud parent, Ehrlich's insights are priceless on pressing issues such as biodiversity loss, overpopulation, depletion of resources, and deterioration of the environment. A lifelong advocate for women's reproductive rights, Ehrlich also helped to debunk scientific bias associating skin color and intelligence and warned, some fifty years ago, about a possible pandemic and the likely ecological consequences of a nuclear war. This book is a vital contribution to literature focused on the human predicament, including problems of governance and democracy in the twenty-first century, and insight into the ecological and evolutionary science of our day. It is a must-read for anyone interested in understanding global change, our
