The ESC Textbook of Heart Failure , 2024-02-16 The ESC Textbook of Heart Failure is the latest addition to the European Society of Cardiology ESC publications portfolio and is fully supported by the European Heart Failure Association The textbook brings together internationally renowned experts in the field of heart failure to present an up to date understanding of all aspects of this chronic condition that worsens with time It is estimated that the worldwide population of patients suffering from heart failure is approximately 26 million This clinically oriented work reflects contemporary European

guidelines from the ESC and the European Heart Failure Association and summarizes the latest evidence from clinical trials. Made up of eighteen different sections, the textbook covers the epidemiology, etiology, prevention, pathophysiology, and clinical phenotypes of heart failure. The assessment and management of chronic, acute, and advanced heart failure are all discussed in detail. As well as chapters dedicated to self-care and patient education, the multidisciplinary approach to heart failure management and clinical trial design and interpretation. The future direction of the field is discussed throughout, with separate chapters on digital health, big data, and telemedicine. Remote monitoring in heart failure is also included. A must-read for cardiovascular healthcare specialists in Europe and across the world, it should also appeal to those in training: general physicians and those caring for the elderly, cardiothoracic surgeons, primary care doctors, and specialist nurses too. ESC Textbook of Cardiovascular Nursing Catriona Jennings, Felicity Astin, Donna Fitzsimons, Ekaterini Lambrinou, Lis Neubeck, David R Thompson, 2021-12-15. Part of the European Society of Cardiology series, the ESC Textbook of Cardiovascular Nursing provides in-depth learning for nurses specialising in caring for patients with coronary heart disease, heart failure, valvular disease, arrhythmias, congenital heart disease, and inherited cardiovascular conditions. The textbook builds on the ESC Core Curriculum for the Continuing Professional Development of Nurses Working in Cardiovascular Care. There are fifteen chapters written by experts in the field. The pathology of coronary heart disease, heart failure, valvular disease, arrhythmias, congenital heart disease, and inherited cardiovascular conditions are all discussed in great detail. Whilst tailoring nursing assessment and interventions to the care of patients with heart disease, the textbook emphasises high-quality holistic care, taking account of the needs of patients with complex comorbidities as well as their families. The imperative of prevention and rehabilitation in terms of both primary and secondary prevention is described, as well as educational, behavioural, and therapeutic interventions. The epidemiology of cardiovascular disease is covered, including disease burden and inequalities across European regions. Chapters devoted to education and communication and pharmacology are also included, and the book concludes with a chapter which discusses the future challenges and opportunities for nurses in addition to the evolution of nursing in cardiovascular care. The target readership of the textbook are nurses entering cardiovascular specialisation and university students undertaking specialist courses in cardiovascular care. The hope of the editors is that the textbook inspires readers to ask questions, search for answers, and become the best cardiovascular nurses they can be. There is a strong body of evidence showing that educational provision for nurses increases patient safety and saves lives. The ESC Textbook of Cardiovascular Nursing aims to be an essential part of this provision.

The ESC Handbook of Preventive Cardiology Catriona Jennings,Ian Graham,Stephan Gielen,2016-06-02 The ESC Handbook of Preventive Cardiology is a how to manual for busy healthcare professionals Complementing the 2012 Joint European Guidelines on cardiovascular disease prevention and in line with recommendations from the European Association

of Preventive Cardiology and it is an invaluable source of tools and skills to assist with the delivery of effective cardiovascular disease prevention. While acknowledging that cardiovascular disease prevention efforts must be complemented by societal and community based strategies, this handbook focuses on practical strategies that can be used in clinical settings. Concise and easily accessible, it guides readers through the patient and family pathway from patient identification, recruitment of the patient and family, assessing lifestyle and risk factors to managing lifestyle change, reducing risk factors and compliance with cardio protective drug therapies. Information on how to deliver a health promotion workshop programme and run a supervised exercise programme is also included. Previously published as *Preventive Cardiology: A practical manual* and now fully revised and updated and packed with checklists and diagrams such as risk estimation charts, *The ESC Handbook of Preventive Cardiology* helps health workers contribute in real and practical ways to the prevention of atherosclerotic cardiovascular disease. This print edition of *The ESC Handbook of Preventive Cardiology: Putting Prevention into Practice* comes with access to the online version on Oxford Medicine Online for as long as the edition is published by Oxford University Press. The ESC Textbook of Preventive Cardiology Stephan Gielen, Guy De Backer, Massimo Piepoli, David Wood, 2015-05-07. Covering both principles and practice, *The ESC Textbook of Preventive Cardiology* is a state of the art resource for both the primary and secondary prevention of atherosclerotic cardiovascular disease. Comprehensive, practical and extensively linked to practice guidelines and recommendations from the European Association of Preventive Cardiology (EAPC), it clearly connects the latest evidence base to strategies and proposals for the implementation of prevention in clinical practice. With a strong clinical focus, the topics covered range from epidemiology and risk stratification through psychological factors, behaviour and motivation to secondary prevention, integrating hospital based and community care for cardiovascular disease prevention and information on cardio protective drugs. Case studies, clinical decision making trees and drug tables with recommended doses and potential side effects make it easier than ever to implement treatments in practice. Drawing together current knowledge and evidence and examining all aspects of preventive cardiology in one succinct volume, *The ESC Textbook of Preventive Cardiology* is the ideal guide for the physician and allied health professional working to prevent and treat cardiovascular disease in their daily practice.
