Arktos Joscelyn Godwin, 1996 *Arktos* is the first book ever written on the archetype of the Poles celestial and terrestrial North and South It is a hair raising voyage through cosmology occultism and conspiracy theory leads to startling revelations about the secrets of the Poles The author investigates legends of a Golden Age which some claim ended in a prehistoric catastrophe a shift in the earth s axis This is examined in the light of the latest geological theories as are predictions of a coming pole shift The perennial fascination of these ideas is shown to be part of a polar tradition of hidden wisdom There are many recorded tales of an ancient race said to have lived in the Arctic regions which later spread through the Northern Hemisphere This supposedly Aryan Race entered the pantheon of Nazi Germany with dreadful consequences The author

examines the origins of modern neo Nazi ideology its polar inspiration and its links with other arcana including the survival of Hitler German bases in Antarctica UFOS the Hollow Earth and the hidden kingdoms of Agartha and Shambhala However Arktos differs from most writings on these subjects in its responsible and scholarly treatment and its extensive use of foreign language sources Provided by publisher Technology of the Gods David Hatcher Childress,2000 Technology of the Gods lays out the mind bending evidence that long lost civilizations had attained and even exceeded our modern level of advancement Westerners have been taught that humankind has progressed along a straight line path from the primitive past to the proficient present but the hard fast evidence literally written in stone proves that the ancients had technologies we cannot even replicate today Navigating the Tides of Change David La Chapelle,2001 This evocative work addresses the challenge of navigating the accelerating pace of change effectively so that we can live more sustainably through the medium of stories told from modern science esoteric and spiritual traditions and Earth wisdom By integrating these often strange bedfellows as well as by emulating great thinkers and doers from history Navigating the Tides of Change presents a compelling case that humankind can create a future in harmony with the Earth **The Biographical Dictionary of Scientists: Lebedev to Zworykin** Roy Porter,Marilyn Bailey Ogilvie,2000 Third Edition Vol 1 Abbe to Leavitt
