The Green Imperative Ecology And Ethics In Design And Architecture:

The Green Imperative: Ecology and Ethics in Design and Architecture Victor Papanek, 2022-02-01 A fresh edition of the sustainable design pioneer Victor Papanek's classic and ever relevant book examining the important role of design in combating climate change Whether it's horror at the plastic littering the world's beaches or despair at the melting polar ice caps the world is gradually waking up to the impending climate disaster In *The Green Imperative* Papanek argues for design that addresses these issues head on This means using materials that can be recycled and reused no more pointless packaging thinking about how products make us feel and engage all our senses putting nature at the heart of design working at a smaller scale rejecting aesthetics for their own sake and thinking before we buy First published at the end of the twentieth century this book offered a plethora of honest advice clear examples and withering critiques laying out the flaws of and opportunities for the design world at that time A quarter of a century on Papanek's lucid prose has lost none of its verve and the problems he highlights have only become more urgent giving today's reader both a fascinating historical perspective on the issues at hand and a blueprint for how they might be solved *The Green Imperative* Victor J. Papanek, 1975 *The Green Imperative* Victor J. Papanek, 1995 In this book Papanek looks at the exciting possibilities for the future if architecture and design were to become environmentally and socially responsible He shows how people can contribute to the well being of the planet through awareness of design

BBC Wildlife ,1996 *Ethnologia Europaea Journal of European Ethnology* Tom O'Dell, Robert Willim, 2012-03-26 Ethnography has become something of a buzzword in recent years It is talked about and invoked in disciplines ranging from anthropology and ethnology to literature history business administration and design studies Textbooks that teach ethnography tend to imbue students with the impression that ethnography is a mode of systematic investigation by which the researcher gets closer to the realities of people s everyday lives But how straightforward are these processes in reality As ethnography spreads into new folds of research both within and without the academy the contributions in this volume demonstrate the manner in which field methods are adjusting transforming or taking new forms altogether If textbooks might lead students to believe that observations and interviews are the grounds upon which good ethnography can regularly be produced the authors in this volume take as their point of departure the realisation that ethnography is being used in a multitude of different contexts which forces them and us as readers to question the regularities and irregularities of their own work *APEC Economic Committee Symposium on the Impact of Expanding Population and Economic Growth on Food, Energy, and the Environment*

Robert Mugerauer, Lynne Manzo, 2008 Because many people and ecosystems share or constitute any given place they all have a stake in the outcome of what any of us do in regard to environmental problems It is not surprising that issues are hotly contested given the many divergent interests needs and preferences of a community s members much less those of people downstream who are affected by the consequences of our actions or of outside parties who play a part including those who would speak on behalf of the ecosystems Thus we not only must make careful individual decisions concerning the environment but need to improve the way we operate socially especially given the roles and responsibilities we have as environmental professionals private sector developers public policy makers and staff or engaged citizens To aid in resolving our environmental dilemmas Mugerauer and Manzo focus on the decision making process Their goal is to help readers become more aware of the worldviews beliefs and values that enter into the decisions they make and to better resolve differences with others To guide readers in thinking about their own positions and how to approach ethical decisions Mugerauer and Manzo employ a number of exercises and cases to investigate the choices and issues that different stakeholders face for example concerning sustainability Additionally the book presents alternatives in terms of formalized ethical principles the major ethical theories and professional codes of ethics *Managing Innovation, Design and Creativity*
