The Korean Management System Cultural Political Economic Foundations:

The Korean Management System Chan S. Chang, Nahn J. Chang, 1994-01-26 The Korean culture and the impact of the geopolitical environment of the Korean peninsula have produced a unique behavioral pattern in both managers and workers. It is necessary to understand this behavioral pattern in order to understand the Korean management system that has played such a major role in contributing to the phenomenal economic achievement of the Korean business community. Entrepreneurs, top executives, managers and workers are all integral parts of the management system and their performance is given an in-depth analysis. After introducing the reader to the Chinese and Japanese cultures that share a common Oriental heritage with the Korean culture, the authors discuss the geopolitical influences of the major powers: China, Russia, Japan and the United States. The Koreans first learned modern management principles from the Japanese and following World War II from the Americans. Later the Korean government actively supported businesses' survival and prosperity. The various entrepreneurial management styles influence the development of Korea's modern managers as well. The impact of the group and individual behavior of Koreans, the evolution of the chaebol, the management of human resources and the Office of Planning and Control are explored in depth. The very special ethical issues that surround Korean business dealings are also given particular attention. Top executives, managers and entrepreneurs doing business in Korea or with Korean businessmen will be interested in this book's discussion of the Korean management system. This book will make excellent supplemental reading material in international business, human resource and strategic management courses.

Harvard Business School Core Collection Baker Library,1999 [AccessAsia](#) ,1997 *Labor Control and Economic Development in South Korea, 1961-1979* Changgyun Oh,1996 The principal theme of this study is the insistence that we must consider the broader institutional dimensions of labor politics if we are to understand why Korean workers have been politically compliant in the 1960s and 1970s The issue of labor compliance has been explained previously by the emphasis on cultural elements and the repressive power of the state A careful consideration of Korean experience in this study suggests that a reduction to cultural imposition or repressive forces would fail to capture the full range of factors affecting workers action Based on the usual practice of the historical comparative institutional studies of political economies this study examines the relationship between institutions ideas and activities One of the central claims of institutionalism is that the actions of individuals or organizations are affected by the institutional structures within which they operate It is through institutions that political and social values became linked to practical activity This study shows that the state did not rely on a simple measure when it controlled labor Rather it drew upon the kinds of cultural institutional materials identified by institutionalists And so did the working class in defining itself Workers in struggle have been drawing upon cultural institutional materials and reshaping them Thus this study insists that labor control strategy in Korea was broader in its scope than repressive control or simple imposition of traditional culture We should consider the broader context of policy that emerged at the time
