Dialogue and Critical Discourse Michael Macovski, 1997-08-07 This interdisciplinary volume of collected mostly unpublished essays demonstrates how Mikhail Bakhtin's theory of dialogic meaning and its subsequent elaborations have influenced a wide range of critical discourses With essays by Michael Holquist Jerome J McGann John Searle Deborah Tannen Gary Saul Morson Caryl Emerson Shirley Brice Heath Don H Bialostosky Paul Friedrich Timothy Austin John Farrell Rachel May and Michael Macovski the collection explores dialogue not only as an exchange among intratextual voices but as an extratextual interplay of historical influences oral forms and cultural heuristics as well Such approaches extend the implications of dialogue beyond the boundaries of literary theory to anthropology philosophy linguistics and cultural studies The essays address such issues as the establishment and exercise of political power the relation between conversational and literary discourse the historical development of the essay and the idea of literature as social action Taken together the essays argue for a redefinition of literary meaning one that is communal interactive and vocatively created They demonstrate that literary meaning is not rendered by a single narrator nor even by a solitary author but is incrementally exchanged and constructed

Modern Criticism Walter E. Sutton, Walter Sutton, 1965 **Language-Paradox-Poetics** James J.Y. Liu, 2014-07-14 In attempting to define a poetics of paradox from a traditional Chinese standpoint James Liu explores through a comparative approach linguistic textual and interpretive problems of relevance to Western literary criticism Liu's study evolves from a paradoxical view originating from early Confucian and Daoist philosophical texts that the less is said in poetry the more is

meant Such a view implied the existence of paradox in the very use of language and led traditional Chinese hermeneutics to a study of metaparadox the use of language to explicate texts the meaning of which transcends language itself As Liu illustrates elements of traditional Chinese hermeneutics with examples of poetic and critical works he makes comparisons with the works of such Western literary figures as Shakespeare Mallarmé Pound Ionesco Derrida and Shepard The comparisons bring to light a crucial difference in conceptualization of language Chinese critics especially those influenced by Daoism and Buddhism seem to have held a deitic view of language language points to things whereas Western critics seem to have thought of language as primarily mimetic language represents things Liu examines the consequences of these views showing how both offer insights into the meaning of text and to what extent both have led to a metaparadox of interpretation Originally published in 1988 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905 *Virgil: The Aeneid* Philip R. Hardie, 1999 **An Introduction to the Philosophy of Art** Richard Eldridge, 2014-03-06 A clear and compact survey of philosophical theories of the nature and value of art in a new expanded edition *Literary Theory* Julie Rivkin, Michael Ryan, 2004-07-23 This anthology of classic and cutting edge statements in literary theory has now been updated to include recent influential texts in the areas of Ethnic Studies Postcolonialism and International Studies A definitive collection of classic statements in criticism and new theoretical work from the past few decades All the major schools and methods that make up the dynamic field of literary theory are represented from Formalism to Postcolonialism Enables students to familiarise themselves with the most recent developments in literary theory and with the traditions from which these new theories derive **Critical Conditions** Horace L. Fairlamb, 1994-05-26 The postmodern debate has been heavily influenced by often contradictory conclusions about the foundations of knowledge hermeneutics challenges epistemology politics challenges science identity theory challenges critical theory pragmatism challenges formalism and so on Horace Fairlamb contends that philosophy's foundationalist quest has usually been misconceived as a choice between a super science and theoretical anarchy Through an examination of the history of foundationism and detailed analysis of the work of leading theorists including Fish Foucault Derrida Gadamer and Habermas Dr Fairlamb argues for a less reductive and less arbitrary conception of knowledge and meaning The result in this 1994 book is a sophisticated critique of contemporary theory with implications for philosophers as well as literary theorists and an important contribution to the re evaluation of theoretical discourse *The Definitive Shakespeare Companion* Joseph Rosenblum, 2017-06-22 This expansive four volume work gives students detailed explanations of Shakespeare's plays and poems and also covers his age life theater texts and language Numerous excerpts from primary source historical documents

contextualize his works while reviews of productions chronicle his performance history and reception Shakespeare's works often served to convey simple truths but they are also complex multilayered masterpieces Shakespeare drew on varied sources to create his plays and while the plays are sometimes set in worlds before the Elizabethan age they nonetheless parallel and comment on situations in his own era Written with the needs of students in mind this four volume set demystifies Shakespeare for today's readers and provides the necessary perspective and analysis students need to better appreciate the genius of his work This indispensable ready reference examines Shakespeare's plots language and themes his use of sources and exploration of issues important to his age the interpretation of his works through productions from the Renaissance to the present and the critical reaction to key questions concerning his writings The book provides coverage of each key play and poems in discrete sections with each section presenting summaries discussions of themes characters language and imagery and clear explications of key passages Readers will be able to inspect historical documents related to the topics explored in the work being discussed and view excerpts from Shakespeare's sources as well as reviews of major productions The work also provides a comprehensive list of print and electronic resources suitable for student research

Shakespeare and Social Theory Bradd Shore, 2021-08-23 This book provides a bridge between Shakespeare studies and classical social theory opening up readings of Shakespeare to a new audience outside of literary studies and the humanities Shakespeare has long been known as a great thinker and this book reads his plays through the lens of an anthropologist revealing new connections between Shakespeare's plays and the lives we now lead Close readings of a selection of frequently studied plays Hamlet The Winter's Tale Romeo and Juliet A Midsummer Night's Dream Julius Caesar and King Lear engage with the texts in detail while connecting them with some of the biggest questions we all ask ourselves about love friendship ritual language human interactions and the world around us The plays are examined through various social theories including performance theory cognitive theory semiotics exchange theory and structuralism The book concludes with a consideration of how the new astronomy of his day and developments in optics changed the very idea of perspective and shaped Shakespeare's approach to embedding social theory in his dramatic texts This accessible and engaging book will appeal to those approaching Shakespeare from outside literary studies but will also be valuable to literature students approaching Shakespeare for the first time or looking for a new angle on the plays

The Etymological Poetry of W. H. Auden, J. H. Prynne, and Paul Muldoon Mia Gaudern, 2020-07-10 This book defines analyses and theorises a late modern etymological poetry that is alive to the past lives of its words and probes the possible significance of them both explicitly and implicitly Close readings of

poetry and criticism by Auden Prynne and Muldoon investigate the implications of their etymological perspectives for the way their language establishes relationships between people and between people and the world These twin functions of communication and representation are shown to be central to the critical reception of etymological poetry which is a category of difficult poetry However resonant poetic etymologising may be critics warn that it shows the poet's natural interest in language degenerating into an unhealthy obsession with the dictionary It is unavoidably pedantic in the post Saussurean era to entertain the idea that a word's history might have any relevance to its current use As such etymological poetry elicits the closest of close readings thus encouraging readers to reflect not only on its own pedantry obscurity and virtuosity but also on how these qualities function in criticism As well as presenting a new way of reading three very different late modern poet critics this book addresses an understudied aspect of the relationship between poetry and criticism Its findings are situated in the context of literary debates about difficulty and diction and in larger cultural conversations about the workings of language as a historical event

Murray Krieger and Contemporary Critical Theory Bruce Henricksen, 1986-05-19 Why do smokers claim that the first cigarette of the day is the best What is the biological basis behind some heavy drinkers' belief that the hair of the dog method alleviates the effects of a hangover Why does marijuana seem to affect one's problem solving capacity Intoxicating Minds is in the author's words a grand excavation of drug myth Neither extolling nor condemning drug use it is a story of scientific and artistic achievement war and greed empires and religions and lessons for the future Ciaran Regan looks at each class of drugs describing the historical evolution of their use explaining how they work within the brain's neurophysiology and outlining the basic pharmacology of those substances From a consideration of the effect of stimulants such as caffeine and nicotine and the reasons and consequences of their sudden popularity in the seventeenth century the book moves to a discussion of more modern stimulants such as cocaine and ecstasy In addition Regan explains how we process memory the nature of thought disorders and therapies for treating depression and schizophrenia Regan then considers psychedelic drugs and their perceived mystical properties and traces the history of placebos to ancient civilizations Finally Intoxicating Minds considers the physical consequences of our co-evolution with drugs how they have altered our very being and offers a glimpse of the brave new world of drug therapies

Beyond Postmodernism Klaus Stierstorfer, 2003 After the veritable hype concerning postmodernism in the 1980s and early 1990s when questions about when it began what it means and which texts it comprises were apt to trigger heated discussions the excitement has notably cooled down at the turn of the

century Voices are now beginning to be heard which seem to suggest a new episteme in the making which points beyond postmodernism while it remains at the same time very uncertain whether what appears as newness is not rather a return to traditional concepts theoretical premises and authorial practices Contributors to this volume propose to explore new openings and recent developments in anglophone literatures and cultural theories which engage with issues seen to be central in the construction of a postmodern paradigm but deal with them in ways that promise new openings or a new Zeitgeist

Edward Said and the Authority of Literary Criticism Nicolas Vandeviver, 2019-09-26 This book examines the earliest writings of Edward Said and the foundations of what came to be known as postcolonial criticism in order to reveal how the groundbreaking author of *Orientalism* turned literary criticism into a form of political intervention Tracing Said's shifting conceptions of literature and agency in relation to the history of American literary studies in the thirty years or so between the end of World War II and the last quarter of the twentieth century this book offers a rich and novel understanding of the critical practice of this indispensable figure and the institutional context from which it emerged By combining broad scale literary history with granular attention to the vocabulary of criticism Nicolas Vandeviver brings to light the harmonizing of methodological conflicts that informs Said's approach to literature and argues that Said's enduring political significance is grounded in his practice as a literary critic
