The Lawyer's English Language Coursebook Catherine Mason, Rosemary Atkins, 2007 LAWYERS ENGLISH
LANGUAGE COURSEBOOK- HIGHER B1/B2 CATHERINE. MASON, 2024 The Lawyer's English Language Coursebook
Catherine Mason, 2021 *Conflict and Peace in the Modern International System* Evan Luard, 1988-01-01 This book is an important contribution to the understanding of conflict and peace in the modern world and to the continuous debate about the best methods to avoid and limit wars This revised edition has the added advantage of having updated information about international and civil conflicts up to the early 1980s This last point is important as there is not any other book that I know of which offers a comprehensive approach to the topic as well as updated information on the international conflicts that happened during the last few years It guides the reader through a complex topic helping one to understand the reasons for conflict and to realistically assess the possibilities for peace in different contexts It also provides well argued policy recommendations about the means to be used to reduce the likelihood of armed conflict its intensity and duration

Economic Methods for Lawyers Emanuel V. Towfigh, Niels Petersen, 2015-11-27 Responding to the growing importance of economic reasoning in legal scholarship this innovative work provides an essential introduction to the economic tools which can usefully be employed in legal reasoning It is geared specifically towards those without a great deal of exposure to economic thinking and provides law students legal scholars and practitioners with a practical toolbox to shape their writing understanding and case preparation The book's clear focus on economic methods poses a refreshing change to conventional textbooks in this area which tend to focus on content related theories Recognising that it is often difficult to derive adequate conclusions for legal arguments without first understanding the methodological limitations of economic studies this book provides a comprehensive coverage of the most important economic concepts in order to bridge this gap These include game theory public choice and social choice theory behavioural economics empirical research design basic statistics Owing to its concise and accessible style *Economic Methods for Lawyers* will provide an invaluable companion for legal scholars or practitioners who wish to utilise economic methods for developing legal argument To Reform the World Guy Fiti Sinclair, 2017-02-16 This book explores how international organizations IOs have expanded their powers over time without formally amending their founding treaties IOs intervene in military financial economic political social and cultural affairs and increasingly take on roles not explicitly assigned to them by law Sinclair contends that this mission creep has allowed IOs to intervene internationally in a way that has allowed them to recast institutions within and interactions among states societies and peoples on a broadly Western liberal model Adopting a historical and interdisciplinary socio legal approach Sinclair supports this claim through detailed investigations of historical episodes involving three very different organizations the International Labour Organization in the interwar period the United Nations in the two decades following the Second World War and the World Bank from the 1950s through to the 1990s The book draws on a wide range of original institutional and

archival materials bringing to light little known aspects of each organization's activities identifying continuities in the ideas and practices of international governance across the twentieth century and speaking to a range of pressing theoretical questions in present day international law and international relations Lawyering Europe Antoine Vauchez, Bruno de Witte, 2013-03-13 While scholarly writing has dealt with the role of law in the process of European integration so far it has shed little light on the lawyers and communities of lawyers involved in that process Law has been one of the most thoroughly investigated aspects of the European integration process and EU law has become a well established academic discipline with the emergence more recently of an impressive body of legal and political science literature on European law in context Yet this field has been dominated by an essentially judicial narrative focused on the role of the European courts underestimating in the process the multifaceted roles lawyers and law play in the EU polity notably the roles they play beyond the litigation arena This volume seeks to promote a deeper understanding of European law as a social and political phenomenon presenting a more complete view of the European legal field by looking beyond the courts and at the same time broadening the scholarly horizon by exploring the ways in which European law is actually made To do this it describes the roles of the great variety of actors who stand behind legal norms and decisions bringing together perspectives from various disciplines law political science political sociology and history to offer a global multi disciplinary reassessment of the role of law and lawyers in the European integration process **Views of European Law from the Mountain** Mielle Bulterman, Leigh Hancher, 2009-02-27 Piet Jan Slot is one of a notable group of innovators who have greatly elucidated the role of law in the construction of European integration His retirement this year from the Law Faculty at Leiden University has occasioned this festschrift in which forty six colleagues past and present recognize his many sterling contributions and engage with issues central to his work Many of them focus on aspects of European competition law while others extend his preoccupations with such fields as environmental regulation energy transport and the interfaces of European law with both Member State law and international global law Ranging from historical tendencies to emerging trends and possibilities the authors explore dozens of relevant topics including the following harmonization of EU law progress of the concept of technical barriers economic justifications and the fundamental freedoms the Keck dichotomy between product requirements and selling arrangements private antitrust enforcement in an international context retail price maintenance competitors role in the public enforcement of the state aid regime scope of judicial review of sanctions in competition law competition and security of supply ownership unbundling proliferation of EU regulatory agencies and the influence of the ECJ on the interpretation of the ECHR Conscious of Slot's ability to identify and analyse the crucial issues of a complicated matter and express them in a clear way adequately attuned to the listener the authors tackle some of the most complex areas in European law Although like Slot they consider European integration as a value that should be respected and fostered by no means do they uncritically accept European law or the way it is made They carry on Slot's work in interpreting and applying European law

to search for solutions that maintain develop and enrich the legal order established by the various European Treaties This challenging and absorbing book offers everyone interested a rich selection of topical as well as controversial issues in a number of areas of European law It is a fitting tribute to the diversity and reach of Slot s contribution to these fields as an academic and practitioner over a period of some forty years
