The Sterling Submachine Gun Matthew Moss, 2018-11-29 Designed by a motorcycle racer turned small arms engineer, George Patchett, the submachine gun that eventually became known as the Sterling was developed during World War II. Some suggest it first saw action during Operation Infatuate with No. 4 Commando before becoming fully adopted by the British Army in 1953 as the Sterling Machine Carbine L2A1. It was centre stage for many of Britain's post colonial conflicts from Malaya to Kenya and from Yemen to Northern Ireland. The silenced L34A1 Sterling Patchett entered service in 1966 and first saw action deep in the jungles of Vietnam in the hands of the elite special forces of Australia, New Zealand and the United States during prisoner snatches and reconnaissance patrols. Employing first hand accounts and painstaking technical analysis, this engaging account features carefully selected archive photography and specially commissioned colour artwork depicting the submachine gun that armed British and other forces for nearly 60 years.

Weapons of the US Special Operations Command Chris McNab, 2019-07-25 The units and formations of the US Special Operations Command (SOCOM) have privileged access to the finest weaponry in the world's arsenal. Whether Army, Navy, Air Force or Marines, the SOCOM troops select weapons that match their mission requirements but which also sit at the cutting edge of combat technology. This means that while SOCOM troops frequently use standard issue weaponry, they also adopt many specialist pieces of kit that are not so accessible to the broader armed services, including sniper rifles, battle rifles and machine guns, as well as high tech tactical accessories used to transform standard weaponry into something exceptional. Assessing the technology and capabilities of these combat weapons, as well as how they have been used in modern combat, this fully illustrated study lifts the veil on some of the most distinctive hand-held weapon systems of US special operations forces since 1987.

Guns of the Special Forces, 2001-2015 Leigh Neville, 2016-03-31 An in-depth look at the weaponry employed by Special Forces units around the world following the September 11th attacks. In the years since 9/11, Special Forces of many nations have been in almost constant action in covert, high-risk operations around the globe. These include the two long conflicts in Iraq and Afghanistan, fighting nationalist insurgents and jihadist terrorists, as well as other lesser-known operations. The weapons used by SF are a constant source of interest and speculation, as are SF training methods and vehicles. The armories of these elite units have developed rapidly to

meet their demands and the ever more sophisticated threat They include for example suppressed piston driven carbines programmable grenade launchers that airburst behind hidden enemy and sniper rifles of extreme accuracy and range This highly researched book gives the reader a privileged insight into this secret world exploring the custom built weapons that operators carry on capture kill missions in the 21st Century Praise for Guns of Special Forces A cut above most of the books that purport to review special ops weapons Its limitation to the War on Terror years allows coverage of the many weapon developments that have taken place as special operations units have been constantly deployed and in action over the last decade and a half SWAT Magazine *Pictorial History of the Sub-machine Gun* Frank William Arthur Hobart,1975 Small Arms Identification and Operation Guide-free World Harold E.
