Dovetailing Economics and Political Science points to the enduring relevance of the concepts of ontology and epistemology as well as to the paramount importance of the paradigms of Mercantilism Liberalism Structuralism and the Critical and Postmodern schools of thought If one is to make sense of the tensions that typify the relations between states and markets in the present day international system one should avoid getting lost in the jungle of competing and or overlapping theories but instead take a step back and focus on the ideal types that paradigms offer This book takes that angle of incidence and therefore provides added value for undergraduate students interested in International Political Economy
