V. Kumar, 2007 **J2EE Architecture** B. V. K. Vijaya Kumar, S. Sangeetha, S. V. Subrahmanya, 2005 **J2EE and Beyond** Art Taylor, 2003 J2EE Design Develop and Deploy WorldClass Java Software is the Java developer s one stop guide to creating and deploying J2EE components Art Taylor an experienced J2EE programmer trainer and author illustrates the importance of architecture and design in effective J2EE applet deployment The case studies and accompanying code provide readers with what they need to know to design architect and deploy J2EE applets effectively In addition the author provides technical depth about a wide spectrum of J2EE technologies touching on virtually all relevant aspects of J2EE development including JSPs servlets RMI network programming and extensive Enterprise JavaBeans coverage **Guide to J2EE: Enterprise Java** John Hunt, Chris Loftus, 2012-12-06 In this book John Hunt and Chris Loftus take you through the core technologies that make up the Enterprise Edition of the Java 2 platform J2EE They cover all the aspects of J2EE that both professionals and students need to know to build multi tier enterprise applications in Java the technologies the design methodology and design patterns Whether you are a professional or student this book will help equip you with the skills you need to build enterprise wide applications in Java Key Topics Includes design issues using J2EE patterns Covers all parts of the enterprise application J2EE Uses an integrated example that spans the chapters to be built up by the reader More accessible and less daunting than a lot of the competition A coherent whole rather than independent separate chapters as with some rivals Features and Benefits Provides an overview of J2EE technologies and their benefits Discusses architectural design issues using J2EE patterns Looks at the issues of designing and building multi tier J2EE applications Includes fully worked examples built up throughout the book which enable you to quickly develop your own

multi tier applications About the Authors Dr John Hunt is Technical Director at JayDeeTechnology Ltd He runs industrial courses including server side Java technologies He also leads development projects for government and blue chip organisations using Java J2EE XML and C Chris Loftus is a Teaching Fellow at the Department of Computer Science at the University of Wales Aberystwyth He has taught Java based courses including J2EE both in university and industry Expert One-on-One J2EE Design and Development Rod Johnson, 2002-10-23 What is this book about The results of using J2EE in practice are often disappointing applications are often slow unduly complex and take too long to develop Rod Johnson believes that the problem lies not in J2EE itself but in that it is often used badly Many J2EE publications advocate approaches that while fine in theory often fail in reality or deliver no real business value Expert One on One J2EE Design and Development aims to demystify J2EE development Using a practical focus it shows how to use J2EE technologies to reduce rather than increase complexity Rod draws on his experience of designing successful high volume J2EE applications and salvaging failing projects as well as intimate knowledge of the J2EE specifications to offer a real world how to guide on how you too can make J2EE work in practice It will help you to solve common problems with J2EE and avoid the expensive mistakes often made in J2EE projects It will guide you through the complexity of the J2EE services and APIs to enable you to build the simplest possible solution on time and on budget Rod takes a practical pragmatic approach questioning J2EE orthodoxy where it has failed to deliver results in practice and instead suggesting effective proven approaches What does this book cover In this book you will learn When to use a distributed architecture When and how to use EJB How to develop an efficient data access strategy How to design a clean and maintainable web interface How to design J2EE applications for performance Who is this book for This book would be of value to most enterprise developers Although some of the discussion for example on performance and scalability would be most relevant to architects and lead developers the practical focus would make it useful to anyone with some familiarity with J2EE Because of the complete design deployment coverage a less advanced developer could work through the book along with a more introductory text and successfully build and understand the sample application This comprehensive coverage would also be useful to developers in smaller organisations who might be called upon to fill several normally distinct roles What is special about this book Wondering what differentiates this book from others like it in the market Take a look It does not just discuss technology but stress its practical application The book is driven from the need to solve common tasks rather than by the elements of J2EE It discuss risks in J2EE development It takes the reader through the entire design development and build process of a non trivial application This wouldn t be compressed into one or two chapters like the Java Pet Store but would be a realistic example comparable to the complexity of applications readers would need to build At each point in the design alternative choices would be discussed This would be important both where there s a real problem with the obvious alternative and where the obvious alternatives are perhaps equally valid It emphasizes the use of OO design and design patterns in J2EE without becoming a theoretical book J2EE Technology in

Practice Rick Cattell, Roderic Geoffrey Galton Cattell, Jim Inscore, 2001 Now there's a realistic no holds barred casebook of today's most important mission critical J2EE enterprise projects Discover what works and what doesn't as you join trailblazers from the industry's leading Java development organizations from Oracle to IBM Rick Cattell and Jim Inscore two of Sun's Java 2 Enterprise Edition J2EE heavyweights cover every key aspect of J2EE development throughout the entire project lifecycle from requirements and architecture through coding deployment maintenance and updates You'll find the viewpoints and experiences of J2EE experts from Allaire ATG Bluestone Forte Gemstone Inprise iPlanet Merant SEcant Silverstream SMC Java Center Sybase and other leaders The book contains solutions focused coverage of every J2EE and related technology including JSP servlets EJB JDBC JNDI security RMI Internet support and XML It introduces best practices for maximizing scalability developer productivity interoperability with existing information systems even avoiding vendor lock in For every IT decision maker and J2EE developer concerned with the realities of J2EE development **J2EE Best**

Practices Jim Kouzes, James M. Kouzes, Barry Z. Posner, 2007-11-29 Learn how to apply robust application design to your J2EE projects There are a number of best practices you need to consider to build highly effective J2EE components and integrate them into applications These practices include evaluating and selecting the right set of software components and services to handle the job In this book Darren Broemmer supplies you with a set of best practices for J2EE development and then teaches you how to use them to construct an application architecture referred to as the reference architecture The design and implementation of the reference architecture is based on a set of guiding principles that are used to optimize and automate J2EE development In addition to the author's thorough discussions of the latest technologies for J2EE implementation including EJB 2 Jakarta Struts Servlets Java Server Pages UML design patterns Common Business Logic Foundation components and XML Broemmer addresses such topics as Understanding J2EE application architecture Building business applications with J2EE a business object architecture and extensible components created with design patterns Designing and implementing a sample banking Web application Integrating proven performance engineering and optimization practices in the development process Using metadata driven configurable foundation components to automate much of the development and processing of Web based business applications The companion Web site contains the source code for a Common Business Logic Foundation and sample applications from the book including a Jakarta Struts project and a banking application Links to the Jakarta Struts frameworks and J2EE application servers such as BEA WebLogic and IBM WebSphere are also provided **J2EE Technology in Practice** R.
