Job Satisfaction is the result of various attitudes possessed by an employee related to job and concerned with wages supervision conditions of work recognition social relations treatment by employer etc Job satisfaction and Work Motivation are closely related to each other Both are based on cause effect relationship i e the more an employee is satisfied the more he is motivated and the vice versa The present book analyses the factors and determinates of Job Satisfaction It also throws light on its relation with Work Motivation and Employees Attitude It critically analyses the factors that determine job satisfaction and measures the level of satisfaction of employees in a specific organization Suggestions and means to improve the satisfaction level of employees are also mention in the book This book is quite valuable to academicians and organizations that are interested in raising the satisfaction level of their employees

Motivation to Work Frederick Herzberg, 2017-07-28 Quality work that fosters job satisfaction and health enjoys top priority in industry all over the world This was not always so Until recently analysis of job attitudes focused primarily on human relations problems within organizations While American industry was trying to solve the unsolvable problem of avoiding interpersonal dissatisfaction problems with the potential for solution such as training and quality production were ignored When first published *The Motivation to Work* challenged the received wisdom by showing that worker fulfillment came from achievement and growth within the job itself In his new introduction Herzberg examines thirty years of motivational research in job related areas Based on workers accounts of real events that have made them feel good or bad on the job the findings of Herzberg and his colleagues have stimulated research and controversy that continue to the present day The authors surprisingly found that while a poor work environment generated discontent improved conditions seldom brought about improved attitudes Instead satisfaction came most often from factors intrinsic to work achievements job recognition and work that was challenging interesting and responsible The evidence marshaled by this volume called into question many previous assumptions about job satisfaction and worker motivation Feelings about intrinsic and extrinsic factors could not be validly averaged on a single scale of measurement Motivation and performance are not merely dependent upon environmental needs and external rewards Frederick Herzberg and his staff based their motivation hygiene theory on a variety of human needs and applied it to a strategy of job enrichment that has widely influenced motivation and job design strategies *Motivation to Work* is a landmark volume that is of enduring interest to sociologists psychologists labor studies specialists and organization analysts
