The Cold War Bipolarity Structure And The Power Vacuum In:

Malaysia and the Cold War Era Ooi Keat Gin, 2020-04-13 From the end of the Second World War in 1945 to the collapse of the Soviet Union in 1991 there was a great deal of turmoil tension and violence in what became Malaysia as a result of the 1963 Federation upheavals included the Malayan Emergency of 1948 1960 the independence of Malaya in 1957 Konfrontasi with Indonesia of 1963 1966 the Philippines claim to Sabah the Sarawak Communist Insurgency 1962 1990 and the Second Malayan Emergency of 1968 1989 This book breaks new ground in arguing for a longer trajectory of the Cold War tracing this phenomenon back to 1920s colonial Malaya and Sarawak Many new research findings showing how Malaysia coped with and overcame the many trials challenges and difficulties are presented here further enriching the historiography

Revolution, State Succession, International Treaties and the Diaoyu/Diaoyutai Islands Tseng Hui-Yi, 2017-05-11 Dynamism in Sino Japanese relations of which the Diaoyu Diaoyutai Islands dispute constitutes a major part has greatly overshadowed not only prospects of positive collaboration between China and Japan but also regional order in East Asia On the surface the essence of the dispute focused on sovereignty which entails competition for maritime resources development and strategic access to the adjacent waters as a critical transportation and military route What lies at the crux however is the conflict between different sets of values which lead and shape their interpretations of international treaties changes of governments and impacts of this upon these Asian states attitudes toward how sovereignty and territory should be understood in contemporary Asia The Diaoyu Diaoyutai Islands dispute has lapsed into dormancy since intense discussions in the period from 2010 to 2012 However the disagreement is far from being resolved This book draws on structural issues underlying the on going dispute along with the concomitant multifaceted challenges that need to be investigated At a juncture when the prospect of the Sino Japanese relations remains gloomy this book provides conceptual and practical insights invaluable to the field of law history and politics shedding light on the refinement of relevant international law and rules of engagement in a normative sense

Regional Security Structures in Asia Ashok Kapor, 2018-10-24 Kapor argues that explanations of international relations in Asia in the post Second World War period have relied too much on the Cold War as a key explanatory factor and have not given enough emphasis to the useful concepts of regional power formation conflict formation and conflict resolution The author outlines these concepts and goes on to elaborate on them and to apply them to three key Asian regions northeast southeast and south Asia discussing practical strategic issues in an historical perspective and arguing that these concepts and other concepts which he discusses are extremely helpful in making sense of the complex pattern of international relations in Asia

[Cold War US Foreign Policy](#) Steven Hurst, 2019-07-31 This book provides the first comprehensive description and critique of the six most important historical interpretations of US Cold War foreign policy Traditionalism Revisionism Post Revisionism Corporatism World Systems Theory and Post Structuralism The author uses the levels of analysis approach to demonstrate how each of these perspectives can be understood as an explanatory

framework combining different types of factors located at different levels of the international system This original way of explaining the work of the historians discussed helps the reader to see past the narrative and empirical elements of their writings and to grasp more clearly the underlying theoretical assumptions In each chapter a description of the perspective s underlying theoretical framework and how it explains US foreign policy is followed by a critique of that theory and explanation A central theme developed throughout the book is the difficulty of managing the constant tension between the explanatory power of theory and the historian s desire to encompass the complex totality of historical events This critical companion can be read alongside the works of the historians themselves showing how they have sought to explain US Cold War foreign policy and the key differences between their perspectives Key Features 1st complete discussion of the 6 schools of thought in one volume Discusses current issues such as corporatism world systems theory and post structuralism in an accessible manner original use of the levels of analysis framework in studying this subject demonstrates in practical terms how each theory explains US Cold War foreign policy

Ending the Cold War R. Herrmann, R. Lebow, 2004-04-02

Although in hindsight the end of the Cold War seems almost inevitable almost no one saw it coming and there is little consensus over why it ended A popular interpretation is that the Soviet Union was unable to compete in terms of power especially in the area of high technology Another interpretation gives primacy to the new ideas Gorbachev brought to the Kremlin and to the importance of leaders and domestic considerations In this volume prominent experts on Soviet affairs and the Cold War interrogate these competing interpretations in the context of five turning points in the end of the Cold War process Relying on new information gathered in oral history interviews and archival research the authors draw into doubt triumphal interpretations that rely on a single variable like the superior power of the United States and call attention to the importance of how multiple factors combined and were sequenced historically The volume closes with chapters drawing lessons from the end of the Cold War for both policy making and theory building

The Determinants and Evolution of Iran's Foreign Policy Toward The Gulf States in the Context of Iran Nuclear Negotiations Aisha Khalid

AL-Saad, 2020-08-11 This book explores the determinants of Iran s foreign policy towards its GCC neighboring countries She considers the dimensions of internal and external as well as identity and nationalism AL Saad aims to identify the strategic importance of Iran s nuclear program the agreement with the major powers in 2015 and its impact on Iran s foreign policy She then addresses possible future scenarios and implications of Iran s foreign policy towards the GCC region upon the US withdrawal from the Iranian nuclear deal

International Relations of East Asia Xiaoming Huang, 2019-12-28 East Asia s rapidly changing role in international security the global economy development and global governance are expertly accounted for in this much needed state of the art text Xiaoming Huang offers an engaging and informed account of the key concepts issues and actors working in this area Ranging from the region s history to culture and a comparative assessment of the region s states this text is informed throughout by a compelling theoretical framework In so doing it unpicks the often

complex relationships both at the domestic level and externally Only with this understanding is it possible to make sense of the region s complex relationships both internally and externally Structured around key concepts in international relations of war and peace economic development and increased contemporary security threats this text offers an empirically rich engaging account of the changing fortunes of East Asia Afghanistan's Endless War Larry P. Goodson,2011-07-01 Going beyond the stereotypes of Kalashnikov wielding Afghan mujahideen and black turbaned Taliban fundamentalists Larry Goodson explains in this concise analysis of the Afghan war what has really been happening in Afghanistan in the last twenty years Beginning with the reasons behind Afghanistan s inability to forge a strong state its myriad cleavages along ethnic religious social and geographical fault lines Goodson then examines the devastating course of the war itself He charts its utter destruction of the country from the deaths of more than 2 million Afghans and the dispersal of some six million others as refugees to the complete collapse of its economy which today has been replaced by monoagriculture in opium poppies and heroin production The Taliban some of whose leaders Goodson interviewed as recently as 1997 have controlled roughly 80 percent of the country but themselves have shown increasing discord along ethnic and political lines **The First Domino** Johanna Cushing Granville,2004 A Fascinating Analysis Based on Newly Declassified Documents from the Former USSR and Communist Bloc On October 23 24 and November 3 4 1956 the Soviet Union invaded Hungary to reassert strict communist rule The First Domino International Decision Making during the Hungarian Crisis of 1956 is the first analytical monograph in English drawing on new archival collections from East bloc countries to reinterpret decision making during this Cold War crisis Johanna Granville selects four key patterns of misperception as laid out by Columbia University political scientist Robert Jervis and shows how these patterns prevailed in the military crackdown and in other countries reactions to it Granville perceptively examines the statements and actions of Soviet Presidium members the Hungarian leadership U S policy makers and even Yugoslav and Polish leaders According to Granville Soviet first secretary Nikita Khrushchev zigzagged ineptly between policy options with apparently little or no analysis of costs and risks permitting Moscow s Eastern European satellites at times to subtly manipulate the Kremlin s decision making Granville s discussions of Polish policy Yugoslav actions and the arduous process of normalization after the uprising show that the Soviets were preoccupied with stemming what many of them construed as a Western encouraged attempt to undermine Eastern Europe s communist regimes Granville concludes that the United States bears some responsibility for the events of 1956 as ill advised U S covert actions may have convinced the Soviet leaders that the United States was attempting to weaken Soviet hegemony over Eastern Europe although the Eisenhower administration actually intended only to sow confusion and dissatisfaction This masterful study leads to the conclusion that the Hungarian Crisis in 1956 was most likely sustained by self perpetuating misperceptions and suspicions among key countries In short Granville s multi archival research tends to confirm the post revisionists theory about the cold war it was everyone s fault and no one s fault It resulted from the emerging bipolar

structure of the international system the power vacuum in Europe's center and spiraling misconceptions **Origins of Containment** Deborah Welch Larson, 2020-06-30 The description for this book *Origins of Containment: A Psychological Explanation* will be forthcoming *The Origins of the Cold War* Caroline Kennedy-Pipe, 2017-11-28 A lively and accessible new introduction to the origins and emergence of the Cold War Caroline Kennedy Pipe brings to life the clashes of ideas and personalities that led Russia and America into decades of conflict and draws out important lessons for policy and analysis in today's equally formative period in world affairs **Courting Science** Damon V. Coletta, 2016-05-25 In *Courting Science* Damon Coletta offers a novel explanation for the decline of American leadership in world affairs Whether the American Century ends sooner rather than later may depend on America's capacity for self-reflection and ultimately self-restraint when it comes to science technology and engineering Democracy's affinity for advanced technology has to be balanced against scientific research and progress as a global enterprise In an era of rising challengers to America's lead in the international order and an increasingly globalized civil society a Scientific State has a better chance of extending its dominance In order to draw closer to this ideal though the United States will have to reconsider its grand strategy It must have a strategy that scrutinizes how tightly it constrains how narrowly it directs and how far it trusts American scientists If given the opportunity scientists have the potential to lead a second American Century through domestic science and technology policy international diplomacy and transnational networks for global governance *Introduction to International Political Economy* David N. Balaam, Bradford Dillman, 2015-07-17 A complete and accessible overview of how politics and economics collide in a global context This text surveys the theories institutions and relationships that characterize IPE and highlights them in a diverse range of regional and transnational issues The bestseller in the field *Introduction to International Political Economy* positions students to critically evaluate the global economy and to appreciate the personal impact of political economic and social forces **America's Mission** Tony Smith, 2012-03-12 *America's Mission* argues that the global strength and prestige of democracy today are due in large part to America's impact on international affairs Tony Smith documents the extraordinary history of how American foreign policy has been used to try to promote democracy worldwide an effort that enjoyed its greatest triumphs in the occupations of Japan and Germany but suffered huge setbacks in Latin America Vietnam and elsewhere With new chapters and a new introduction and epilogue this expanded edition also traces U.S. attempts to spread democracy more recently under presidents Clinton Bush and Obama and assesses America's role in the Arab Spring 國際關係學概論(第四版), 2007 **ASEAN-Korea Relations** Ho Khai Leong, 2007 This book examines the growing interdependence between ASEAN and Korea and the political and economic realities governing the relationship Leading experts from ASEAN and Korea discuss the emerging issues in areas of domestic and regional security environments non-traditional security regional trade arrangements Korean relations with the new ASEAN member states and the prospects of community building with special reference to the roles of Korea and ASEAN It also provides a serious and thought-provoking

evaluation of future ASEAN Korea relations in light of the growing trend towards East Asian regionalism **Bd. 1**, 1993

The Interregnum: Controversies in World Politics 1989-1999 Michael Cox, Ken Booth, Timothy Dunne, 1999 The Interregnum Controversies in World Politics 1989 1999 is a series of critical reflections on the major controversies in and about world politics in the 1990s We are living in an era which seemingly defies description in social and political theory our age is frequently referred to as post modern in international relations we remain in the post Cold War age The age is only characterised by what it is not This collection of critical reflections written by leading scholars in the field sheds light on the meanings of world politics in what we are calling The Interregnum The central question of the Special Issue might be put as follows what do the major controversies in world politics in the 1990s tell us about the characteristics of the age who we are and where world politics might be going The Cold War Endgame Ralph L. Dietl, 2022-09-06 This book examines the planned disaggregation of the global structures of the Cold War In the final years of a decades long era of bipolarity the United States and the Soviet Union co managed a continental transformation that erased Europe s Iron Curtain *The Cold War and After* Sean M. Lynn-Jones, Steven E. Miller, 1993 The Cold War and After presents a collection of well reasoned arguments selected from the journal International Security on the causes of the Cold War and the effect of its aftermath on the peaceful coexistence of European states This new edition includes all of the material from the first edition plus four new articles The Unipolar Illusion Why New Great Powers Will Rise Christopher Layne International Primacy Is the Game Worth the Candle Robert Jervis Why International Primacy Matters Samuel P Huntington and International Relations Theory and the End of the Cold War John Lewis Gaddis Sean M Lynn Jones is Managing Editor of International Security Steven E Miller is Director of Studies at the Center for Science and International Affairs Harvard University
