The Evolution Of Desire Revised By David M Buss:

The Evolution of Desire David M. Buss, 2016-12-27 A drop dead shocker Washington Post Book World that uses evolutionary psychology to explain human mating and the mysteries of love If we all want love why is there so much conflict in our most cherished relationships To answer this question we must look into our evolutionary past argues prominent psychologist David M Buss Based on one of the largest studies of human mating ever undertaken encompassing more than 10 000 people of all ages from thirty seven cultures worldwide *The Evolution of Desire* is the first work to present a unified theory of human mating behavior Drawing on a wide range of examples of mating behavior from lovebugs to elephant seals from the Yanomam tribe of Venezuela to online dating apps Buss reveals what women want what men want and why their desires radically differ Love has a central place in human sexual psychology but conflict competition and manipulation also pervade human mating something we must confront in order to control our own mating destiny Updated to reflect the very latest scientific research on human mating this definitive edition of this classic work of evolutionary psychology explains the powerful forces that shape our most intimate desires

The Caveman Mystique Martha McCaughey, 2008 Has evolution made men promiscuous skirt chasers Pop Darwinian claims about men's irrepressible heterosexuality have become increasingly common and increasingly common excuses for men's sexual aggression *The Caveman Mystique* traces such claims about the hairier sex through evolutionary science and popular culture After outlining the social and historical context of the rise of pop Darwinism's assertions about male sexuality and their appeal to many men Martha McCaughey shows how evolutionary discourse can get lived out as the biological truth of male sexuality Although evolutionary scientists want to use their theories to solve social problems evolutionary narratives get invoked by men looking for a Darwinian defense of bad boy behaviors McCaughey argues that evolution has nearly replaced religion as a moral guide for understanding who we are and what we must overcome to be good people Bringing together insights from the fields of science studies body studies feminist theory and queer theory *The Caveman Mystique* offers a fresh understanding of science science popularization and the impact of science on men's identities making a convincing case for deconstructing rather than defending the caveman

Creating Consilience Edward Slingerland, Mark Collard, 2012-01-19 Calls for a consilient or vertically integrated approach to the study of human mind and culture have for the most part been received by scholars in the humanities with either indifference or hostility One reason for this is that consilience has often been framed as bringing the study of humanistic issues into line with the study of non human phenomena rather than as something to which humanists and scientists contribute equally The other major reason that consilience has yet to catch on in the humanities is a dearth of compelling examples of the benefits of adopting a consilient approach *Creating Consilience* is the product of a workshop that brought together internationally renowned scholars from a variety of fields to address both of these issues It includes representative pieces from workshop speakers and participants that examine how adopting such a consilient stance informed

by cognitive science and grounded in evolutionary theory would concretely impact specific topics in the humanities examining each topic in a manner that not only cuts across the humanities natural science divide but also across individual humanistic disciplines By taking seriously the fact that science humanities integration is a two way exchange this volume takes a new approach to bridging the cultures of science and the humanities The editors and contributors formulate how to develop a new shared framework of consilience beyond mere interdisciplinarity in a way that both sides can accept

Gender and Culture in America Linda Stone, Nancy P. McKee, Nancy Patricia McKee, 2002 This lively book uses a historical framework to address gender in America in terms of a set of dominant cultural themes explaining how these themes both fluctuate over time and are responded to in different ways by various ethnic groups and social classes It encourages readers to consider gender in America as enmeshed in the country's distinctive cultural traditions Chapter topics include a cultural history of American gender 1600 to 1900 a look at the twentieth century coverage of native Americans African Americans Latinos and Asian Americans gender on the college campus and themes and issues of American gender For anyone interested in getting a better look at mainstream American cultural values concerning gender *Thinking About Social Life* Lloyd E. Sandelands, 2003-10-22 This book is a work of philosophy concerning how we should think about social life Whereas social science has traditionally been a study of social physics a study of material individuals that interact in time and space it must become a study of social life a study of the vital forms and feelings of an inherently social species Working upon an image of life as a branching tree the book makes a case for a concept of social life founded upon a study of three fundamental dynamics love play and individuation *The Lipstick Proviso* Karen Lehrman, 1997 In this groundbreaking book Lehrman sets the course for a new feminism one that draws essential distinctions between the personal and the political acknowledges biological differences between men and women and celebrates the unique qualities desires and goals of women as individuals **Differences**, 2004 *Fears and Symbols* Elemér Hankiss, 2001 An encyclopedic study on the role that fear and anxiety have played as the organizing motives of human existence and social life Hankiss explains how human beings have surrounded themselves with protective symbols myths and religions values and belief systems ideas and scientific theories moral and practical rules of behaviour and a wide range of everyday rituals and trivialities **The Individual, Marriage, and the Family** Lloyd Saxton, 1996 A truly interdisciplinary approach this text incorporates biological psychological and sociological perspectives to the study of the family **The Boyfriend Test** Wendy Walsh, 2001-01-01 Questions and compatibility tests help women determine their motivations when entering a relationship evaluate a man's potential and maintain a healthy relationship *Nigeria and the Classics*, 2006 The Bible and Homosexual Practice Robert A. J. Gagnon, 2001 Gagnon offers the most thorough analysis to date of the biblical texts relating to homosexuality His strong and clearly articulated argument establishes that the Bible contains a unanimous witness defining same sex intercourse as sin He does so while rigorously engaging biblical scholars and historians who have written both for and against this understanding of same sex intercourse In addition he demonstrates systematically why attempts to classify as irrelevant for our contemporary context the Bible's rejection of same sex intercourse fail to do justice to the biblical texts His conclusions are clear and compassionate as he cautions readers on all sides of the debate against a truncated gospel and challenges all to strive for a holistic view of the command to love God and neighbor *Modern Love* Marcus Collins, 2003 Drawing on social economic and political history this volume explains how relations have changed

between men and women in Britain in the 20th century It shows how men and women s expectations from life have radically shifted and converged describing how we have moved from inhabiting our separate spheres with wholly different prospects and values towards the ideal if not quite the actuality of equality mutuality companionship and friendship This text also shows how progressive ideas about the relationship between men and women that originated in Britain reverberated throughout the world
