 calculating for the year 1688 he put the population at approximately 5 5 million Historians have recently doubted the  
 accuracy of these estimates In this book John A Taylor argues that King was an honest compiler of statistics and that his  
 eccentric calculations based on the available 1696 data were motivated by the problems he faced Because he used only  
 empiricism and shop arithmetic the 1696 estimates were probably as accurate as anyone in the 17th century could have
