Plant-Microbes-Engineered Nano-particles (PM-ENPs) Nexus in Agro-Ecosystems

Pardeep Singh, Rishikesh Singh, Pramit Verma, Rahul Bhadouria, Ajay Kumar, Mahima Kaushik, 2021-03-22 This book presents a collection of cross disciplinary research with contributions addressing all key features of the plant microbe ENP nexus in agro ecosystems The uptake transport and transformation of nanoparticles in plants have attracted more and more attention in the past several years Especially the impact of Engineered Nanoparticles ENPs on bioprocesses low medium and high level dose responses in the microbial community of soil and long medium and short term exposure responses particularly microbial nitrogen transformations are just a few of the aspects involved Since ENPs are used in many industries including cosmetics agriculture medicine food technology and waste management their transport through biogeochemical cycles is an important focus of many studies today Specifically ENP microbe interaction has been analysed with regard to disease treatment for plants it plays a vital role in disease inhibition by releasing metal ions that act through many pathways e g reactive oxygen species ROS generation DNA transformation and disruption of the cell cycle to stop cell growth in the pathogen Due to these properties ENPs are also used as slow release or delayed release pesticides and fungicides and as carrier systems for growth promoting hormones Despite their multiple uses in various industries the negative effects of ENPs are still a major concern for the scientific community and consumers alike For example their transport to various food chains has been reported to have adverse effects This raises a degree of doubt concerning a rapidly growing scientific field with major applications in many industries From a sustainable development perspective and particularly to ensure food security in light of the uncertainty accompanying climate change it is imperative to address this divergence by focusing on the plant microbe ENP nexus
