The Evolution Of Desire Strategies Human Mating David M Buss:

The Evolution of Desire David M. Buss, 2016-12-27 A drop dead shocker Washington Post Book World that uses evolutionary psychology to explain human mating and the mysteries of love If we all want love why is there so much conflict in our most cherished relationships To answer this question we must look into our evolutionary past argues prominent psychologist David M Buss Based one of the largest studies of human mating ever undertaken encompassing more than 10 000 people of all ages from thirty seven cultures worldwide *The Evolution of Desire* is the first work to present a unified theory of human mating behavior Drawing on a wide range of examples of mating behavior from lovebugs to elephant seals from the Yanomam tribe of Venezuela to online dating apps Buss reveals what women want what men want and why their desires radically differ Love has a central place in human sexual psychology but conflict competition and manipulation also pervade human mating something we must confront in order to control our own mating destiny Updated to reflect the very latest scientific research on human mating this definitive edition of this classic work of evolutionary psychology explains the powerful forces that shape our most intimate desires

The Oxford Handbook of Human Mating David M. Buss, 2023 The scientific study of human mating has mushroomed over the past three decades This handbook showcases the best and the brightest scientists in the field providing up to date summaries of theories and empirical evidence of the science of human mating strategies It includes major sections on theories of human mating mate selection and mate attraction mate competition sexual conflict in mating human pair bonding the endocrinology of mating and mating in the modern world

Summary of David M. Buss's The Evolution of Desire Everest Media, 2022-03-31T22:59:00Z Please note This is a companion version not the original book Sample Book Insights 1 The elements of human mating are extremely confusing We grow up believing in true love finding our one and only and assuming that once we do we will live happily ever after But reality rarely coincides with our beliefs 2 Sexual selection is the process by which certain characteristics are chosen based on their mating benefits instead of their survival benefits It takes two forms same sex competition in which members of the same sex compete with each other and mate choice in which individuals choose a mate based on their preferences for particular qualities 3 The theory of sexual selection was first developed to explain mating behavior and it was fiercely resisted by male scientists for over a century because it seemed to grant too much power to females 4 I began an international study to see how mates are selected in different cultures and found that many of the findings did not agree with conventional thinking They forced a shift from the standard view of men s

and women's sexual psychology The Dangerous Passion David M. Buss, 2000-02-14 Why do men and women cheat on each other How do men really feel when their partners have sex with other men What worries women more men who turn to other women for love or men who simply want sexual variety in their lives Can the jealousy husbands and wives experience over real or imagined infidelities be cured Should it be In this surprising and engaging exploration of men's and women's darker passions David Buss acclaimed author of *The Evolution of Desire* reveals that both men and women are actually designed for jealousy Drawing on experiments surveys and interviews conducted in thirty seven countries on six continents as well as insights from recent discoveries in biology anthropology and psychology Buss discovers that the evolutionary origins of our sexual desires still shape our passions today According to Buss more men than women want to have sex with multiple partners Furthermore women who cheat on their husbands do so when they are most likely to conceive but have sex with their spouses when they are least likely to conceive These findings show that evolutionary tendencies to acquire better genes through different partners still lurk beneath modern sexual behavior To counteract these desires to stray and to strengthen the bonds between partners jealousy evolved as an early detection system of infidelity in the ancient and mysterious ritual of mating Buss takes us on a fascinating journey through many cultures from pre historic to the present to show the profound evolutionary effect jealousy has had on all of us Only with a healthy balance of jealousy and trust can we be certain of a mate's commitment devotion and true love **The Caveman Mystique** Martha McCaughey, 2008

Has evolution made men promiscuous skirt chasers Pop Darwinian claims about men's irrepressible heterosexuality have become increasingly common and increasingly common excuses for men's sexual aggression *The Caveman Mystique* traces such claims about the hairier sex through evolutionary science and popular culture After outlining the social and historical context of the rise of pop Darwinism's assertions about male sexuality and their appeal to many men Martha McCaughey shows how evolutionary discourse can get lived out as the biological truth of male sexuality Although evolutionary scientists want to use their theories to solve social problems evolutionary narratives get invoked by men looking for a Darwinian defense of bad boy behaviors McCaughey argues that evolution has nearly replaced religion as a moral guide for understanding who we are and what we must overcome to be good people Bringing together insights from the fields of science studies body studies feminist theory and queer theory *The Caveman Mystique* offers a fresh understanding of science science popularization and the impact of science on men's identities making a convincing case for deconstructing rather than defending the caveman

Reading Human Nature Joseph Carroll, 2011-03-01 As the founder and leading practitioner of literary Darwinism Joseph Carroll remains at the forefront of a major movement in literary studies Signaling key new developments in this approach *Reading Human Nature* contains trenchant theoretical essays innovative empirical research sweeping surveys of intellectual history and sophisticated interpretations of specific literary works including *The Picture of Dorian Gray* *Wuthering Heights* *The Mayor of Casterbridge* and *Hamlet* Evolutionists in the social sciences have succeeded in delineating basic motives but

have given far too little attention to the imagination Carroll makes a compelling case that literary Darwinism is not just another school or movement in literary theory It is the moving force in a fundamental paradigm change in the humanities a revolution Psychologists and anthropologists have provided massive evidence that human motives and emotions are rooted in human biology Since motives and emotions enter into all the products of a human imagination humanists now urgently need to assimilate a modern scientific understanding of human nature Integrating evolutionary social science with literary humanism Carroll offers a more complete and adequate understanding of human nature **Psychology** Don H.

Hockenbury,Sandra E. Hockenbury,2002-07-19 New edition of the Hockenburys text which draws on their extensive teaching and writing experiences to speak directly to students who are new to psychology *Discovering Psychology* Don H.

Hockenbury,Sandra E. Hockenbury,2010-01-27 A multimedia enhanced eBook integrates the text a rich assortment of media powered learning opportunities and a variety of customization features for students and instructors Worth s acclaimed eBook platform was developed by a cognitive psychologist Pepper Williams Ph D Yale University who taught undergraduate psychology at the University of Massachusetts **The Evolution of Human Sociality** Stephen K. Sanderson,2001 This text attempts a broad theoretical synthesis within the field of sociology and its closely allied sister discipline of anthropology It draws together these disciplines theoretical approaches into a synthesized theory called Darwinian conflict theory

 Soble,2006 **The Bible and Homosexual Practice** Robert A. J. Gagnon,2001 Gagnon offers the most thorough analysis
 to date of the biblical texts relating to homosexuality His strong and clearly articulated argument establishes that the Bible
 contains a unanimous witness defining same sex intercourse as sin He does so while rigorously engaging biblical scholars
 and historians who have written both for and against this understanding of same sex intercourse In addition he demonstrates
 systematically why attempts to classify as irrelevant for our contemporary context the Bible s rejection of same sex
 intercourse fail to do justice to the biblical texts His conclusions are clear and compassionate as he cautions readers on all
 sides of the debate against a truncated gospel and challenges all to strive for a holistic view of the command to love God and
 neighbor Don't Use My Sweater Like a Towel Jennifer Kelton,2007-10 Jennifer Kelton has taken a generation of self help
 books and turned them on their heads with a reality based book on dating and mating for the 21st Century Jam packed with
 revealing surveyes scientific research and humourous X rated episodes Don t Use My Sweater Like a Towel is not your
 parent s dating book Kelton delivers impassioned insights poses pertinent questions and presents startling facts that will
 spur fiery water cooler conversations Not only will this book give the sexes a better understanding of how they interface with
 each other but it will also bring them closer together Readers will read what happens when Kelton spends a year
 investigating the dating scene and following the advice of America s top self help books **Big Questions in Science**
 Harriet Swain,2002 In this work leading scientific thinkers address 20 of the really big questions that people have been
 asking for hundreds of years The contributors include John Sulston Susan Greenfield John Barrow and David Buss
Michigan Law Review ,2000 Marriages and Families Nijole Vaicaitis Benokraitis,1996 This textbook introduces
 students to the study of marriage and the family in ways to which they can easily relate Giving equal attention to people of all
 racial ethnic and other societal groups the author shows students that as families continue to change they have more and
 more choices but that those choices are also subject to often serious constraints on both the macro and micro level The
 author s approach encourages students to think for themselves and practical guidelines in every chapter encourage them to
 go beyond thought to action to become part of the effort to resolve some of the crucial issues that confront all 21st century
